GENE EXPRESSION

Cell Cycle-Dependent Variations in Deoxyribonucleotide Metabolism among Chinese Hamster Cell Lines Bearing the Thy- Mutator Phenotype. Byung-Joo Mun and Christopher K. Mathews .............................................. 20–26

Intramitochondrial Functions Regulate Nonmitochondrial Citrate Synthase (CIT2) Expression in Saccharomyces cerevisiae. Xinsheng Liao, W. Curtis Small, Paul A. Srere, and Ronald A. Butow .............................................. 38–46

Retrovirus-Induced Interference with Collagen I Gene Expression in Mov13 Fibroblasts Is Maintained in the Absence of DNA Methylation. Hedy Chan, Stefan Hartung, and Michael Breindl .............................................. 47–54

Two Distinct Domains in the Yeast Transcription Factor IID and Evidence for a TATA Box-Induced Conformational Change. Paul M. Lieberman, Martin C. Schmidt, C. Cheng Kao, and Arnold J. Berk .............................................. 63–74

Positive and Negative Regulation of Immunoglobulin Gene Expression by a Novel B-Cell-Specific Enhancer Element. Jiyang Wang, Makoto Oketani, and Takeshi Watanabe .............................................. 75–83

Characterization of the Mouse Transforming Growth Factor-B1 Promoter and Activation by the Ha-ras Oncogene. Andrew G. Geiser, Seong-Jin Kim, Anita B. Roberts, and Michael B. Sporn .............................................. 84–92

Binding of the Transcription Factor EBP-80 Mediates the Methylation Response of an Intracisternal A-Particle Long Terminal Repeat Promoter. Miriam Falzon and Edward L. Kuff .............................................. 117–125

Positive Regulation of jun/AP-1 by E1A. Rolf de Groot, Nicholas Foulkes, Maarten Mulder, Wiebe Kruijer, and Paolo Sassone-Corsi .............................................. 192–201

Structure and Regulation of Histone H2B mRNAs from Leishmania enriettii. Jane E. Genske, Bradley R. Cairns, Sean P. Stack, and Scott M. Landfear 240–249

Maintenance of NF-κB Activity Is Dependent on Protein Synthesis and the Continuous Presence of External Stimuli. Hans-Peter Hohmann, Roland Remy, Claus Scheidereit, and Adolphus P. G. M. van Loon .............................................. 259–266

Continued on following page
Continued from preceding page

The Strong ADH1 Promoter Stimulates Mitotic and Meiotic Recombination at the ADE6 Gene of *Schizosaccharomyces pombe*. Christian Grimm, Primo Schaefer, Peter Munz, and Jürg Kohli ........................................ 289–298

Transient Activity Assays of the *Trypanosoma brucei* Variant Surface Glycoprotein Gene Promoter: Control of Gene Expression at the Posttranscriptional Level. David Jefferies, Patricia Tebabi, and Etienne Pays .................. 338–343

Role of the Ligand in Intracellular Receptor Function: Receptor Affinity Determines Activation In Vitro of the Latent Dioxin Receptor to a DNA-Binding Form. Scott Cuthill, Anna Wilhelmsson, and Lorenz Poellinger .......... 401–411

In Vivo Pre-tRNA Processing in *Saccharomyces cerevisiae*. J. Patrick O'Connor and Craig L. Peebles .................................................. 425–439

Sequence Organization and RNA Structural Motifs Directing the Mouse Primary rRNA-Processing Event. Nessly Craig, Susan Kass, and Barbara Sollner-Webb ......................................................... 458–467

ACE2, an Activator of Yeast Metallothionein Expression Which Is Homologous to SWI5. Geraldine Butler and Dennis J. Thiele .................. 476–485

Suppression of Ribosomal Reinitiation at Upstream Open Reading Frames in Amino Acid-Starved Cells Forms the Basis for *GCN4* Translational Control. Jean-Pierre Abastado, Paul F. Miller, Belinda M. Jackson, and Alan G. Hinnebusch .................................................. 486–496

Transcriptional and Posttranscriptional Regulation of Maize Mitochondrial Gene Expression. R. Michael Mulligan, Patricia Leon, and Virginia Walbot .......... 533–543

*Neurospora crassa* Clock-Controlled Genes Are Regulated at the Level of Transcription. Jennifer J. Loros and Jay C. Dunlap ............... 558–563

Proline-Independent Binding of PUT3 Transcriptional Activator Protein Detected by Footprinting In Vivo. Jeffrey D. Axelrod, John Majors, and Marjorie C. Brandriss ............................................ 564–567

Continued on following page

The Same CCAAT Box-Binding Factor Binds to the Promoter of Two Coordinately Regulated Major Histocompatibility Complex Class II Genes. Michael J. Kern and Jerold G. Woodward ........................................ 578–581

CELL GROWTH AND DEVELOPMENT

Tumor Suppressor p53: Analysis of Wild-Type and Mutant p53 Complexes. Jo Milner, Elizabeth A. Medcalf, and Alistair C. Cook ....................................................... 12–19

Aspergillus nidulans weta Activates Spore-Specific Gene Expression. Margaret A. Marshall and William E. Timberlake ................................................................. 55–62

Heparin and Hormonal Regulation of mRNA Synthesis and Abundance of Autocrine Growth Factors: Relevance to Clonal Growth of Tumors. Isabel Zvibel, Elaine Halay, and Lola M. Reid ............................................................... 108–116

Isolation and Characterization of PKC-L, a New Member of the Protein Kinase C-Related Gene Family Specifically Expressed in Lung, Skin, and Heart. Nina Bacher, Yaffa Zisman, Eva Berent, and Etta Livneh ........................................ 126–133

SDC25, a CDC25-Like Gene Which Contains a RAS-Activating Domain and Is a Dispensable Gene of Saccharomyces cerevisiae. Faten Damak, Emmanuelle Boy-Marcotte, Danièle Le-Roscouet, Rolande Guilbaud, and Michel Jacquet ........................................................................ 202–212

Activin-A Binding and Biochemical Effects in Osteoblast-Enriched Cultures from Fetal-Rat Parietal Bone. Michael Centrella, Thomas L. McCarthy, and Ernesto Canalis ........................................................................ 250–258

c-myc Reverses neu-Induced Transformed Morphology by Transcriptional Repression. Ting-Chung Suen and Mien-Chie Hung ........................................................................ 354–362

Continued on following page

The Immediate-Early Growth Response in Regenerating Liver and Insulin-Stimulated H-35 Cells: Comparison with Serum-Stimulated 3T3 Cells and Identification of 41 Novel Immediate-Early Genes. Kenneth L. Mohn, Thomas M. Laz, Jui-Chou Hsu, Anna E. Melby, Rodrigo Bravo, and Rebecca Taub ... 381–390

The Oncogenic Potential of an Activated Hox-2.4 Homeobox Gene in Mouse Fibroblasts. Daniel Aberdam, Varda Negreanu, Leo Sachs, and Cila Blatt 554–557

Induction of Growth Arrest by a Temperature-Sensitive p53 Mutant Is Correlated with Increased Nuclear Localization and Decreased Stability of the Protein. Doron Ginsberg, Dan Michalovitz, Dorit Ginsberg, and Moshe Oren ... 582–585

CELL AND ORGANELLE STRUCTURE AND ASSEMBLY

Determinants for Glycophospholipid Anchoring of the Saccharomyces cerevisiae GAS1 Protein to the Plasma Membrane. Claude Nuofer, Paul Jenö, Andreas Conzelmann, and Howard Riezman ............................ 27–37

Mutational Analysis of the Functional Domains of Yeast K1 Killer Toxin. Hong Zhu and Howard Bussey ........................................... 175–181

A Chicken β-Actin Gene Can Complement a Disruption of the Saccharomyces cerevisiae ACT1 Gene. Roger Karlsson, Pontus Aspenström, and Anders S. Byström ........................................... 213–217

Isolation, Nucleotide Sequence Analysis, and Disruption of the MDH2 Gene from Saccharomyces cerevisiae: Evidence for Three Isozymes of Yeast Malate Dehydrogenase. Karyl I. Minard and Lee McAlister-Henn .... 370–380

Dictyostelium discoideum Lipids Modulate Cell-Cell Cohesion and Cyclic AMP Signaling. Donna R. Fontana, Chunsheng Luo, and John C. Phillips .... 468–475

Peroxisomes in Saccharomyces cerevisiae: Immunofluorescence Analysis and Import of Catalase A into Isolated Peroxisomes. Rolf Thieringer, Helen Shio, Yingshi Han, Gerald Cohen, and Paul B. Lazarow .................... 510–522

Alternative Initiation of Translation Determines Cytoplasmic or Nuclear Localization of Basic Fibroblast Growth Factor. Beatrix Bugler, François Amalric, and Hervé Prats ........................................... 573–577

CHROMOSOME STRUCTURE AND DYNAMICS

In Vivo Genomic Footprint of a Yeast Centromere. Lezlie Densmore, William E. Payne, and Molly Fitzgerald-Hayes .......................... 154–165

Continued on following page
Continued from preceding page

The Yeast rad18 Mutator Specifically Increases G·C → T·A Transversions without Reducing Correction of G·A or C·T Mismatches to G·C Pairs. Bernard A. Kunz, Xiaolin Kang, and Lester Kohalmi ........................................... 218–225

Differential Compartmentalization of Plasmid DNA Microinjected into *Xenopus laevis* Embryos Relates to Replication Efficiency. Nicholas J. Marini and Robert M. Benbow ........................................................................ 299–308

A Poly(dA·dT) Tract Is a Component of the Recombination Initiation Site at the ARG4 Locus in *Saccharomyces cerevisiae*. Neil P. Schultes and Jack W. Szostak ........................................................................................................ 322–328

Repair of Deletions and Double-Strand Gaps by Homologous Recombination in a Mammalian In Vitro System. Rolf Jessberger and Paul Berg ............. 445–457

ERRATA

In Vitro Processing at the 3'-Terminal Region of Pre-18S rRNA by a Nucleolar Endoribonuclease. Christine M. Shumard, Claribel Torres, and Duane C. Eichler ........................................................................................................... 593

The DNA Damage-Inducible Gene *DIN1* of *Saccharomyces cerevisiae* Encodes a Regulatory Subunit of Ribonucleotide Reductase and Is Identical to *RNR3*. Kevin Yagle and Kevin McEntee ........................................ 594
