GENE EXPRESSION

The Multiple RNA-Binding Domains of the mRNA Poly(A)-Binding Protein Have Different RNA-Binding Activities. Christopher G. Burd, Erika L. Matunis, and Gideon Dreyfuss ................................................................. 3419–3424

Structural Analyses of the 7SK Ribonucleoprotein (RNP), the Most Abundant Human Small RNP of Unknown Function. David A. Wassarman and Joan A. Steitz ................................................................. 3432–3445

Differential Regional Expression of Three Natriuretic Peptide Receptor Genes within Primate Tissues. Josiah N. Wilcox, Andrew Augustine, David V. Goeddel, and David G. Lowe ................................................................. 3454–3462

Poly(ADP-Ribose) Polymerase Inhibitors Suppress UV-Induced Human Immunodeficiency Virus Type 1 Gene Expression at the Posttranscriptional Level. Satoshi Yamagoe, Takashi Kohda, and Michio Oishi ................................................................. 3522–3527

Negative Regulation of Globin Gene Expression during Megakaryocytic Differentiation of a Human Erythroleukemic Cell Line. Nadya L. Lumelsky and Bernard G. Forget ................................................................. 3528–3536

The Complex Set of Late Transcripts from the Drosophila Sex-Determination Gene Sex-lethal Encodes Multiple Related Polypeptides. Mark E. Samuels, Paul Schedl, and Thomas W. Cline ................................................................. 3584–3602

AAR1/TUP1 Protein, with a Structure Similar to That of the β Subunit of G Proteins, Is Required for α1-α2 and α2 Repression in Cell Type Control of Saccharomyces cerevisiae. Yukio Mukai, Satoshi Harashima, and Yasuji Oshima ................................................................. 3773–3779

Continued on following page
SECRETION AND TRANSCRIPTIONAL REGULATION OF TRANSFORMING GROWTH FACTOR-β3 DURING MYOGENESIS. Robert Lafyatis, Robert Lechleider, Anita B. Roberts, and Michael B. Sporn 3795–3803

TRANSCRIPTIONAL REGULATION

PITUITARY PRO-OPIOLEUACOCORTIN GENE EXPRESSION REQUIRES SYNERGISTIC INTERACTIONS OF SEVERAL REGULATORY ELEMENTS. Marc Therrien and Jacques Drouin 3492–3503

MODULAR RECOGNITION OF 5-BASE-PAIR DNA SEQUENCE MOTIFS BY HUMAN HEAT SHOCK TRANSCRIPTION FACTOR. Nina F. A. Cunniff, John Wagner, and William D. Morgan 3504–3514

THE BLOCK TO TRANSCRIPTION ELONGATION AT THE MINUTE VIRUS OF MICE ATTENUATOR IS REGULATED BY CELLULAR ELONGATION FACTORS. Anat Krauskopf, Eyal Bengal, and Yosef Aloni 3515–3521

DNA-BINDING SPECIFICITY OF THE FUSI TARAZU HOMEODOMAIN. Brian Florence, Richard Handrow, and Allen Laughon 3613–3623

TRANSCRIPTIONAL REGULATION BY FOS AND JUN IN VITRO: INTERACTION AMONG MULTIPLE ACTIVATOR AND REGULATORY DOMAINS. Cory Abate, Daniel Luk, and Tom Curran 3624–3632

INEFFICIENT HOLMOOLIGOMERIZATION CONTRIBUTES TO THE DEPENDENCE OF MYOGENIN ON E2A PRODUCTS FOR EFFICIENT DNA BINDING. Tushar Chakraborty, Thomas J. Brennan, Li Li, Diane Edmondson, and Eric N. Olson 3633–3641

RAP1 IS REQUIRED FOR BAS1/BAS2- AND GCN4-DEPENDENT TRANSCRIPTION OF THE YEAST HIS4 GENE. Cecilia Devlin, Kimberly Tice-Baldwin, David Shore, and Kim T. Arndt 3642–3651

MUTATION OF SERUM RESPONSE FACTOR PHOSPHORYLATION SITES AND THE MECHANISM BY WHICH ITS DNA-BINDING ACTIVITY IS INCREASED BY CASEIN KINASE II. J. Robert Manak and Ron Prywes 3652–3659

ECDYSTERONE RECEPTOR IS A SEQUENCE-SPECIFIC TRANSCRIPTION FACTOR INVOLVED IN THE DEVELOPMENTAL REGULATION OF HEAT SHOCK GENES. Yan Luo, Jahanshah Amin, and Richard Voellmy 3660–3675

ROLE OF HEAT SHOCK TRANSCRIPTION FACTOR IN YEAST METALLOTHIONEIN GENE EXPRESSION. Weimin Yang, William Gahl, and Dean Hamer 3676–3681

THE MYOSIN LIGHT CHAIN ENHANCER AND THE SKELETAL ACTIN PROMOTER SHARE A BINDING SITE FOR FACTORS INVOLVED IN MUSCLE-SPECIFIC GENE EXPRESSION. Heidemarie Ernst, Ken Walsh, Charles A. Harrison, and Nadia Rosenthal 3735–3744

ß-CASEIN GENE PROMOTER ACTIVITY IS REGULATED BY THE HORMONE-MEDIATED RELIEF OF TRANSCRIPTIONAL REPRESSION AND A MAMMARY-GLAND-SPECIFIC NUCLEAR FACTOR. Michael Schmitt-Ney, Wolfgang Doppler, Roland K. Ball, and Bernd Groner 3745–3755

COMPLEX TRANSCRIPTIONAL REGULATION OF THE SACCHAROMYCES CEREVISIAE CYB2 GENE ENCODING CYTOCHROME b2: CYP1(HAP1) ACTIVATOR BINDS TO THE CYB2 UP-STREAM ACTIVATION SITE UAS1-B2. Tiziana Lodi and Bernard Guiard 3762–3772

CELL GROWTH AND DEVELOPMENT

A POSSIBLE ROLE FOR A MAMMALIAN FACILITATIVE HEXOSE TRANSPORTER IN THE DEVELOPMENT OF RESISTANCE TO DRUGS. Juan C. Vera, Gonzalo R. Castillo, and Ora M. Rosen 3407–3418

Continued on following page

Mutational Analysis of CDC42Sc, a Saccharomyces cerevisiae Gene That Encodes a Putative GTP-Binding Protein Involved in the Control of Cell Polarity. Michael Ziman, Jeanne M. O'Brien, Laurie A. Ouellette, William R. Church, and Douglas I. Johnson ................................................. 3537–3544

byr2, a Schizosaccharomyces pombe Gene Encoding a Protein Kinase Capable of Partial Suppression of the rasI Mutant Phenotype. Yan Wang, Hao-Peng Xu, Michael Riggs, Linda Rodgers, and Michael Wigler .................. 3554–3563

Alteration of Homeobox Gene Expression by N-ras Transformation of PA-1 Human Teratocarcinoma Cells. Reinhard Buettner, Sun O. Yim, Young S. Hong, Eduardo Boncinelli, and Michael A. Tainsky ......................... 3573–3583

Protein Synthesis Requirements for Nuclear Division, Cytokinesis, and Cell Separation in Saccharomyces cerevisiae. Daniel J. Burke and Deanna Church .......................................................... 3691–3698

Depletion of c-myc with Specific Antisense Sequences Reverses the Transformed Phenotype in ras Oncogene-Transformed NIH 3T3 Cells. Marshall D. Sklar, Elizabeth Thompson, Michael J. Welsh, Monica Liebert, John Harney, H. Barton Grossman, Michael Smith, and Edward V. Prochownik .................................................. 3699–3710

Regulation of a Double-Stranded RNA Modification Activity in Human Cells. Louisa M. Morrissey and Karla Kirkegaard .......................................................... 3719–3725

Platelet-Derived Growth Factor (PDGF)-Induced Disulfide-Linked Dimerization of PDGF Receptor in Living Cells. Wei Li and Joseph Schlessinger ............ 3756–3761

CELL AND ORGANELLE STRUCTURE AND ASSEMBLY

Competitive Inhibition of a Set of Endoplasmic Reticulum Protein Genes (GRP78, GRP94, and ERP72) Retards Cell Growth and Lowers Viability after Iono- phore Treatment. Xuan Li and Amy S. Lee .................................................. 3446–3453

An Endoplasmic Reticulum-Specific Cyclophilin. Karl W. Hasel, James R. Glass, Martin Godbout, and J. Gregor Sutcliffe .................................................. 3484–3491

Significance of C-Terminal Cysteine Modifications to the Biological Activity of the Saccharomyces cerevisiae a-Factor Mating Pheromone. Stevan Marcus, Guy A. Caldwell, David Miller, Chu-Biao Xue, Fred Naider, and Jeffrey M. Becker .................................................. 3603–3612

The HXT1 Gene Product of Saccharomyces cerevisiae Is a New Member of the Family of Hexose Transporters. Deborah A. Lewis and Linda F. Bisson 3804–3813

Continued on following page
DNA DYNAMICS AND CHROMOSOME STRUCTURE

In Vivo Characterization of the *Saccharomyces cerevisiae* Centromere DNA Element I, a Binding Site for the Helix-Loop-Helix Protein CPF1. Rainer Niedenthal, Regine Stoll, and Johannes H. Hegemann .......................... 3545–3553

ERRATUM

GAL11 (SPT13), a Transcriptional Regulator of Diverse Yeast Genes, Affects the Phosphorylation State of GAL4, a Highly Specific Transcriptional Activator. Roy M. Long, Lawrence M. Mylin, and James E. Hopper .............. 3821
