Characterization of *Saccharomyces cerevisiae* Genes Encoding Subunits of Cyclic AMP-Dependent Protein Kinase. John F. Cannon and Kelly Tatchell .... 2653–2663

Phycomyces blakesleeanus *TRPI* Gene: Organization and Functional Complementation in *Escherichia coli* and *Saccharomyces cerevisiae*. José L. Revuelta and Makkuni Jayaram ......................................................... 2664–2670

Identification and Regulation of a Gene Required for Cell Fusion during Mating of the Yeast *Saccharomyces cerevisiae*. Gretchen McCaffrey, Fiona J. Clay, Kimberly Kelsay, and George F. Sprague ...................................................... 2680–2690

Glucocorticoids Selectively Inhibit Translation of Ribosomal Protein mRNAs in P1798 Lymphosarcoma Cells. Oded Meyuhas, E. Aubrey Thompson, Jr., and Robert P. Perry .......................................................... 2691–2699

Mutations Affecting Assembly and Stability of Tubulin: Evidence for a Nonessential β-Tubulin in CHO Cells. Barbara Boggs and Fernando Cabral ........ 2700–2707

*LEU3* of *Saccharomyces cerevisiae* Encodes a Factor for Control of RNA Levels of a Group of Leucine-Specific Genes. Phillip Friden and Paul Schimmel .... 2708–2717

Structure and Ligand Specificity of the *Drosophila melanogaster* Insulin Receptor. Rafael Fernandez-Almonacid and Ora M. Rosen ........................................ 2718–2727

*Saccharomyces cerevisiae* Positive Regulatory Gene *PET111* Encodes a Mitochondrial Protein That Is Translated from an mRNA with a Long 5' Leader. Christine A. Strick and Thomas D. Fox .................................................. 2728–2734

Binding of a Cellular Protein to the Gibbon Ape Leukemia Virus Enhancer. John P. Quinn, Nikki Holbrook, and David Levens ...................................... 2735–2744

High-Efficiency Transformation of Mammalian Cells by Plasmid DNA. Claudia Chen and Hiroto Okayama ................................................................. 2745–2752

Transcription of the Constitutively Expressed Yeast Enolase Gene *ENO1* Is Mediated by Positive and Negative cis-Acting Regulatory Sequences. Regina Cohen, Teresa Yokoi, Janice P. Holland, Alan E. Pepper, and Michael J. Holland ........................................................................ 2753–2761

*Aplysia californica* Neurons Express Microinjected Neuropeptide Genes. Luc DesGroseillers, David Cowan, Michael Miles, Alex Sweet, and Richard H. Scheller ..................................................................................... 2762–2771

Identification and Isolation of the Gene Encoding the Small Subunit of Ribonucleotide Reductase from *Saccharomyces cerevisiae*: a DNA Damage-Inducible Gene Required for Mitotic Viability. Stephen J. Elledge and Ronald W. Davis ........................................................................... 2783–2793

Immortalization of Human Fibroblasts Transformed by Origin-Defective Simian Virus 40. David S. Neufeld, Sally Ripley, Ann Henderson, and Harvey L. Ozer ..................................................................................... 2794–2802

Duplicated CArG Box Domains Have Positive and Mutually Dependent Regulatory Roles in Expression of the Human α-Cardiac Actin Gene. Takeshi Miwa and Larry Kedes ................................................................. 2803–2813

Continued on following page
Isolation of Microcell Hybrid Clones Containing Retroviral Vector Insertions into Specific Human Chromosomes. Tracy G. Lugo, Barbara Handelin, Ann M. Killary, David E. Housman, and R. E. K. Fournier ................. 2814–2820

Molecular Cloning of Gene Sequences Regulated by Tumor Promoters and Mitogens through Protein Kinase C. Mark D. Johnson, Gerard M. Housey, Paul T. Kirschmeier, and I. Bernard Weinstein ....................... 2821–2829

Site-Specific Demethylation and Normal Chromatin Structure of the Human Dihydrofolate Reductase Gene Promoter after Transfection into CHO Cells. Takashi Shimada, Koiti Inokuchi, and Arthur W. Nienhuis .................. 2830–2837

Developmental Regulation of a Novel Repetitive Protein of Trypanosoma brucei. Michael R. Mowatt and Christine E. Clayton .................. 2838–2844

Expression of bcr and bcr-abl Fusion Transcripts in Normal and Leukemic Cells. Steven Collins, Howard Coleman, and Mark Groudine .................. 2870–2876

U1 Small Nuclear Ribonucleoproteins Are Required Early during Spliceosome Assembly. Martin Zillmann, Scott D. Rose, and Susan M. Berget ........ 2877–2883

Primary Processing of Mammalian rRNA Involves Two Adjacent Cleavages and Is Not Species Specific. Susan Kass, Nessly Craig, and Barbara Sollner-Webb .................. 2891–2898

Structural Analyses of the Human U3 Ribonucleoprotein Particle Reveal a Conserved Sequence Available for Base Pairing with Pre-rRNA. Katherine A. Parker and Joan A. Steitz .................. 2899–2913

Codon Replacement in the PGK1 Gene of Saccharomyces cerevisiae: Experimental Approach To Study the Role of Biased Codon Usage in Gene Expression. Andre Hoekema, Rob A. Kastelein, Mark Vasser, and Herman A. de Boer .................. 2914–2924

Control of Thymidine Kinase mRNA during the Cell Cycle. Donald L. Coppock and Arthur B. Pardee .................. 2925–2932

Identification of the Principal Promoter Sequence of the c-H-ras Transforming Oncogene: Deletion Analysis of the 5′-Flanking Region by Focus Formation Assay. Hidenori Honkawa, Wakako Masahashi, Setsuko Hashimoto, and Tamotsu Hashimoto-Gotoh .................. 2933–2940

Saccharomyces cerevisiae SSB1 Protein and Its Relationship to Nucleolar RNA-Binding Proteins. Ambrose Y.-S. Jong, Michael W. Clark, Mary Gilbert, Alexander Oehm, and Judith L. Campbell .................. 2947–2955

Continued on following page

Transcriptional Activation of the Glucose-Regulated Protein Genes and Their Heterologous Fusion Genes by β-Mercaptoethanol. Yong Kyu Kim and Amy S. Lee ................................................................. 2974–2976

Genetic Rescue of Muscle Defects Associated with a Mutant Drosophila melanogaster Tropomyosin Allele. Eric A. Fyrberg and Christine C. Karlik .... 2977–2980

Ankyrin-Bound Fatty Acid Turns over Rapidly at the Erythrocyte Plasma Membrane. Matthias Staufenbiel 2981–2984

Differential Promoter Utilization by the c-myc Gene in Mitogen- and Interleukin-2-Stimulated Human Lymphocytes. H. Elizabeth Broome, John C. Reed, Elizabeth P. Godillot, and Richard G. Hoover 2988–2993

Different Early-Signaling Pathways Coupled to Transcriptional and Posttranscriptional Regulation of Gene Expression during Mitogenic Activation of T Lymphocytes. Michael W. White, Amy E. Oberhauser, Christine A. Kuepfer, and David R. Morris 3004–3007

In Situ Protein-DNA Interactions at a Dioxin-Responsive Enhancer Associated with the Cytochrome P1-450 Gene. Linda K. Durrin and James P. Whitlock, Jr. 3008–3011

Transient Correction of Genetic Defects in Cultured Animal Cells by Introduction of Functional Proteins. Daisy Ortiz, Margaret M. Baldwin, and Joseph J. Lucas 3012–3017

The Natural 5' Splice Site of Simian Virus 40 Large T Antigen Can Be Improved by Increasing the Base Complementarity to U1 RNA. Yuan Zhuang, Helios Leung, and Alan M. Weiner 3018–3020

Plasminogen Activator Inhibitor Type 1 Biosynthesis and mRNA Level Are Increased by Dexamethasone in Human Fibrosarcoma Cells. Peter A. Andreasen, Charles Pyke, Andrea Riccio, Peter Kristensen, Lars S. Nielsen, Leif R. Lund, Francesco Blasi, and Keld Danø 3021–3025

Date of Issue: 30 July 1987
