

# MOLECULAR AND CELLULAR BIOLOGY

Volume 1	Contents for February 1981	Number 2
Isolation and Characterization of Dominant Mutations Resistant to Carbon Catabolite Repression of Galactokinase Synthesis in <i>Saccharomyces cerevisiae</i> . KUNIHIRO MATSUMOTO, AKIO TOH-E, AND YASUJI OSHIMA*		83-93
Cellular and Extracellular Siderophores of <i>Aspergillus nidulans</i> and <i>Penicillium chrysogenum</i> . GISELA CHARLANG, BRADFORD NG, NORMAN H. HOROWITZ,* AND ROBERT M. HOROWITZ		94-100
Post-Translational Regulation of the 54K Cellular Tumor Antigen in Normal and Transformed Cells. MOSHE OREN, WARREN MALTZMAN, AND ARNOLD J. LEVINE*		101-110
Deoxyribonucleic Acid-Mediated Gene Transfer in Mammalian Cells: Molecular Analysis of Unstable Transformants and Their Progression to Stability. GEORGE A. SCANGOS,* KENNETH M. HUTTNER, DIANE K. JURICEK, AND FRANK H. RUDDLE		111-120
Excision of Pyrimidine Dimers from Nuclear Deoxyribonucleic Acid in Ultraviolet-Irradiated <i>Dictyostelium discoideum</i> . JAMES M. CLARK AND REGINALD A. DEERING*		121-127
Membrane Phase State and the Rearrangement of Hematopoietic Cell Surface Receptors. PATRICK L. WILLIAMSON,* WILLIAM A. MASSEY, BONNIE M. PHELPS, AND ROBERT A. SCHLEGEL		128-135
Electron Microscopy of <i>Achlya</i> Deoxyribonucleic Acid Sequence Organization. MARIA PELLEGRINI,* WILLIAM E. TIMBERLAKE, AND ROBERT B. GOLDBERG		136-143
55,000-Dalton, Retrovirus-Associated, Cell Membrane Glycoprotein: Purification and Quantitative Measurements of Expression in Viruses, Cells, and Tissues. DAVID A. SCHEINBERG AND METTE STRAND*		144-152
<i>RAD6<sup>+</sup></i> Gene of <i>Saccharomyces cerevisiae</i> Codes for Two Mutationally Separable Deoxyribonucleic Acid Repair Functions. MICK F. TUIE* AND BRIAN S. COX		153-157
Glutamate Synthase Levels in <i>Neurospora crassa</i> Mutants Altered with Respect to Nitrogen Metabolism. NIGEL S. DUNN-COLEMAN, ELLEN A. ROBEY, A. BRIAN TOMSETT, AND REGINALD H. GARRETT*		158-164
Changes in Protein Phosphorylation in Rous Sarcoma Virus-Transformed Chicken Embryo Cells. JONATHAN A. COOPER* AND TONY HUNTER		165-178
Large Heterogeneous Nuclear Ribonucleic Acid Has Three Times as Many 5' Caps as Polyadenylic Acid Segments, and Most Caps Do Not Enter Polyribosomes. M. SALDITT-GEORGIEFF, MICHAEL M. HARPOLD, MICHAEL C. WILSON, AND JAMES E. DARNELL, JR.*		179-187
Chinese Hamster Polyadenylated Messenger Ribonucleic Acid: Relationship to Non-Polyadenylated Sequences and Relative Conservation During Messenger Ribonucleic Acid Processing. MICHAEL M. HARPOLD, MICHAEL C. WILSON, AND JAMES E. DARNELL, JR.*		188-198

\* Asterisk refers to person to whom inquiries regarding the paper should be addressed.
