

# MOLECULAR AND CELLULAR BIOLOGY

Volume 10

January 1990

No. 1

## GENE EXPRESSION

<b><i>ras</i> Oncogene Activation of a VL30 Transcriptional Element Is Linked to Transformation.</b> Russell D. Owen, Donna M. Bortner, and Michael C. Ostrowski.....	1-9
<b>Active <math>\beta</math>-Globin Gene Transcription Occurs in Methylated, DNase I-Resistant Chromatin of Nonerythroid Chicken Cells.</b> Rodrigo Lois, Lita Freeman, Bryant Villeponteau, and Harold G. Martinson.....	16-27
<b>The Product of the <i>H19</i> Gene May Function as an RNA.</b> Camilynn I. Brannan, Elizabeth Claire Dees, Robert S. Ingram, and Shirley M. Tilghman.....	28-36
<b>Recombination between Irradiated Shuttle Vector DNA and Chromosomal DNA in African Green Monkey Kidney Cells.</b> John S. Mudgett and William D. Taylor.....	37-46
<b>Molecular Basis of <math>\alpha</math>1-Antitrypsin Deficiency and Emphysema Associated with the <math>\alpha</math>1-Antitrypsin M<sub>mineral springs</sub> Allele.</b> David T. Curiel, Claus Vogelmeier, Richard C. Hubbard, Larue E. Stier, and Ronald G. Crystal.....	47-56
<b>cDNA Genes Formed after Infection with Retroviral Vector Particles Lack the Hallmarks of Natural Processed Pseudogenes.</b> Ralph Dornburg and Howard M. Temin.....	68-74
<b>Exon Definition May Facilitate Splice Site Selection in RNAs with Multiple Exons.</b> Barbara L. Robberson, Gilbert J. Cote, and Susan M. Berget.....	84-94
<b>A Naturally Occurring Gamma Globin Gene Mutation Enhances SP1 Binding Activity.</b> Kathryn Sykes and Russel Kaufman.....	95-102
<b>Multiple, Compensatory Regulatory Elements Specify Spermatocyte-Specific Expression of the <i>Drosophila melanogaster hsp26</i> Gene.</b> Robert L. Glaser and John T. Lis.....	131-137
<b>A Murine <i>fer</i> Testis-Specific Transcript (<i>ferT</i>) Encodes a Truncated Fer Protein.</b> Kineret Fischman, Jeffrey C. Edman, Gregory M. Shackelford, Jennifer A. Turner, William J. Rutter, and Uri Nir.....	146-153
<b>Developmental Regulation of Specific Protein Interactions with an Enhancerlike Binding Site Far Upstream from the Avian Very-Low-Density Apolipoprotein II Gene.</b> Pamela A. Hoodless, Rabindra N. Roy, Aimee K. Ryan, Robert J. G. Haché, Monika Z. Vasa, and Roger G. Deeley.....	154-164
<b>Factor Substitution in a Human HSP70 Gene Promoter: TATA-Dependent and TATA-Independent Interactions.</b> Ian C. A. Taylor and Robert E. Kingston.....	165-175
<b>E1a Transactivation of Human HSP70 Gene Promoter Substitution Mutants Is Independent of the Composition of Upstream and TATA Elements.</b> Ian C. A. Taylor and Robert E. Kingston.....	176-183
<b>Platelet-Derived Growth Factor-Stimulated <i>c-myc</i> RNA Accumulation in MG-63 Human Osteosarcoma Cells Is Independent of Both Protein Kinase A and Protein Kinase C.</b> Kevin K. Frick and Charles D. Scher.....	184-192
<b>Molecular and Functional Analysis of the Muscle-Specific Promoter Region of the Duchenne Muscular Dystrophy Gene.</b> Henry J. Klamut, Suman B. Gangopadhyay, Ronald G. Worton, and Peter N. Ray.....	193-205
<b>Regulatory Elements Mediating Transcription from the <i>Drosophila melanogaster</i> Actin 5C Proximal Promoter.</b> Yang-Tsung Chung and Elizabeth B. Keller.....	206-216

Continued on following page

<b>Transcription Analysis, Physical Mapping, and Molecular Characterization of a Nonclassical Human Leukocyte Antigen Class I Gene.</b> Michael J. Chorney, Ikuhisa Sawada, Gerald A. Gillespie, Rakesh Srivastava, Julian Pan, and Sherman M. Weissman . . . . .	243–253
<b>The DNA-Binding Activity of Transcription Factor PTF1 Parallels the Synthesis of Pancreas-Specific mRNAs during Mouse Development.</b> S. Petrucco, P. K. Wellauer, and O. Hagenbüchle. . . . .	254–264
<b>Steroid Hormone Regulation of the <i>Achlya ambisexualis</i> 85-Kilodalton Heat Shock Protein, a Component of the <i>Achlya</i> Steroid Receptor Complex.</b> Shelley A. Brunt, Robert Riehl, and Julie C. Silver . . . . .	273–281
<b>Cell Type-Specific Protein-DNA Interactions in the Human <math>\zeta</math>-Globin Upstream Promoter Region: Displacement of Sp1 by the Erythroid Cell-Specific Factor NF-E1.</b> Chun-Yuan Yu, Julia Chen, Liang-In Lin, Ming Tam, and C.-K. James Shen . . . . .	282–294
<b>Polyadenylation-Specific Complexes Undergo a Transition Early in the Polymerization of a Poly(A) Tail.</b> Vivian J. Bardwell and Marvin Wickens . . . . .	295–302
<b>PRP18, a Protein Required for the Second Reaction in Pre-mRNA Splicing.</b> Usha Vijayraghavan and John Abelson . . . . .	324–332
<b>Octamer and SPH Motifs in the U1 Enhancer Cooperate To Activate U1 RNA Gene Expression.</b> Kenneth A. Roebuck, Daniel P. Szeto, Kenneth P. Green, Qian N. Fan, and William E. Stumph . . . . .	341–352
<b>Estradiol and Estrogen Receptor-Dependent Stabilization of a Minivitellogenin mRNA Lacking 5,100 Nucleotides of Coding Sequence.</b> David A. Nielsen and David J. Shapiro . . . . .	371–376
<b>Termination Region in rRNA Genes from a Eucaryotic Thermophile, <i>Thermomyces lanuginosus</i>.</b> Katherine Walker, William M. Wong, and Ross N. Nazar . . . . .	377–381
<b>Transcription of the Promoter of the Rat NF-1 Gene Depends on the Integrity of an Sp1 Recognition Site.</b> Rosario Ammendola, Fotini Gounari, Giulia Piaggio, Vincenzo De Simone, and Riccardo Cortese . . . . .	387–390
<b>Cyclic AMP Analogs and Retinoic Acid Influence the Expression of Retinoic Acid Receptor <math>\alpha</math>, <math>\beta</math>, and <math>\gamma</math> mRNAs in F9 Teratocarcinoma Cells.</b> Lan Hu and Lorraine J. Gudas. . . . .	391–396
<b>Effects of Methotrexate on Transfected DNA Stability in Mammalian Cells.</b> Maria G. Pallavicini, Patricia S. DeTeresa, Caridad Rosette, Joe W. Gray, and Florian M. Wurm . . . . .	401–404
<b>The <i>sum1-1</i> Mutation Affects Silent Mating-Type Gene Transcription in <i>Saccharomyces cerevisiae</i>.</b> George P. Livi, James B. Hicks, and Amar J. S. Klar . . . . .	409–412
<b>A Gene That Encodes a Protein Consisting Solely of Zinc Finger Domains Is Preferentially Expressed in Transformed Mouse Cells.</b> Michèle Ernoult-Lange, Michel Kress, and Dean Hamer . . . . .	418–421
<b>Lipopolysaccharide-Unresponsive Mutant Pre-B-Cell Lines Blocked in NF-<math>\kappa</math>B Activation.</b> Michael Briskin, Michael Damore, Ronald Law, Grace Lee, Paul W. Kincade, Carol H. Sibley, Michael Kuehl, and Randolph Wall. . . . .	422–425
<b>ACE1 Transcription Factor Produced in <i>Escherichia coli</i> Binds Multiple Regions within Yeast Metallothionein Upstream Activation Sequences.</b> Claire F. Evans, David R. Engelke, and Dennis J. Thiele . . . . .	426–429

- Molecular Cloning of *Xenopus* Fibrillarlin, a Conserved U3 Small Nuclear Ribonucleoprotein Recognized by Antisera from Humans with Autoimmune Disease.** Bruno Lapeyre, Paolo Mariottini, Colette Mathieu, Pierre Ferrer, Francesco Amaldi, François Amalric, and Michèle Caizergues-Ferrer. . . . . 430–434

CELL GROWTH AND DEVELOPMENT

- Induction of Differentiation in *v*-Ha-*ras*-Transformed MDCK Cells by Prostaglandin E<sub>2</sub> and 8-Bromo-Cyclic AMP Is Associated with a Decrease in Steady-State Level of Inositol 1,4,5-Trisphosphate.** Yvonne Y. Wu and Michael C. Lin. . . . . 57–67
- A Putative Transmembrane Protein with Histidine-Rich Charge Clusters Encoded in the *H-2K/t<sup>w5</sup>* Region of Mice.** Benoit St.-Jacques, Tae-Hee Han, Armand MacMurray, and Hee-Sup Shin. . . . . 138–145
- Importance of Introns in the Growth Regulation of mRNA Levels of the Proliferating Cell Nuclear Antigen Gene.** Luigi Ottavio, Chung-Der Chang, Maria-Giulia Rizzo, Salvatore Travali, Carmen Casadevall, and Renato Baserga 303–309
- Ha-*ras*<sup>Val-12, Thr-59</sup> Activates S6 Kinase and p34<sup>cdc2</sup> Kinase in *Xenopus* Oocytes: Evidence for *c-mos*<sup>xe</sup>-Dependent and -Independent Pathways.** C. Brent Barrett, Robert M. Schroetke, Frans A. Van der Hoorn, Steven K. Nordeen, and James L. Maller . . . . . 310–315
- Diacylglycerol Production in *Xenopus laevis* Oocytes after Microinjection of p21<sup>ras</sup> Proteins Is a Consequence of Activation of Phosphatidylcholine Metabolism.** Juan Carlos Lacal. . . . . 333–340
- Early Activation of Endogenous pp60<sup>src</sup> Kinase Activity during Neuronal Differentiation of Cultured Human Neuroblastoma Cells.** Catarina Bjelfman, Gabrielle Meyerson, Christine A. Cartwright, Karin Mellström, Ulf Hammerling, and Sven Pählman . . . . . 361–370
- Neutron Radiation Can Activate *K-ras* via a Point Mutation in Codon 146 and Induces a Different Spectrum of *ras* Mutations than Does Gamma Radiation.** Steven R. Sloan, Elizabeth W. Newcomb, and Angel Pellicer 405–408
- The Human T-Lymphotropic Virus Type I *tax* Gene Can Cooperate with the *ras* Oncogene To Induce Neoplastic Transformation of Cells.** Rudy Pozzatti, Jonathan Vogel, and Gilbert Jay . . . . . 413–417

CELL AND ORGANELLE STRUCTURE AND ASSEMBLY

- Role of Adenovirus E1B Proteins in Transformation: Altered Organization of Intermediate Filaments in Transformed Cells That Express the 19-Kilodalton Protein.** Eileen White and Ralph Cipriani. . . . . 120–130
- Signal-Mediated Import of Bacteriophage T7 RNA Polymerase into the *Saccharomyces cerevisiae* Nucleus and Specific Transcription of Target Genes.** Bret M. Benton, Wai-Kwong Eng, John J. Dunn, F. William Studier, Rolf Sternglanz, and Paul A. Fisher . . . . . 353–360

CHROMOSOME STRUCTURE AND DYNAMICS

- RPO41*-Independent Maintenance of [*rho*<sup>-</sup>] Mitochondrial DNA in *Saccharomyces cerevisiae*.** Walton L. Fangman, John W. Henly, and Bonita J. Brewer . . . 10–15
- Carcinogen-Induced DNA Amplification In Vitro: Overreplication of the Simian Virus 40 Origin Region in Extracts from Carcinogen-Treated CO60 Cells.** Yehudit Berko-Flint, Shulamit Karby, David Hassin, and Sara Lavi. . . . . 75–83

Continued from preceding page

<b>Intermolecular Recombination between DNAs Introduced into Mouse L Cells Is Mediated by a Nonconservative Pathway That Leads to Crossover Products.</b> Fwu-Lai M. Lin, Karen Sperle, and Nat Sternberg.....	103-112
<b>Repair of Double-Stranded DNA Breaks by Homologous DNA Fragments during Transfer of DNA into Mouse L Cells.</b> Fwu-Lai M. Lin, Karen Sperle, and Nat Sternberg .....	113-119
<b>Overexpression of the <i>STE4</i> Gene Leads to Mating Response in Haploid <i>Saccharomyces cerevisiae</i>.</b> Malcolm Whiteway, Linda Hougan, and David Y. Thomas.....	217-222
<b>Chromosome Instability Mutants of <i>Saccharomyces cerevisiae</i> That Are Defective in Microtubule-Mediated Processes.</b> M. Andrew Hoyt, Tim Stearns, and David Botstein .....	223-234
<b>Characterization of Holliday Structures in FLP Protein-Promoted Site-Specific Recombination.</b> Leslie Meyer-Leon, Ross B. Inman, and Michael M. Cox	235-242
<b>Reversion of Autonomously Replicating Sequence Mutations in <i>Saccharomyces cerevisiae</i>: Creation of an Eucaryotic Replication Origin within Procaryotic Vector DNA.</b> David Kipling and Stephen E. Kearsey .....	265-272
<b>The <i>Drosophila Hrb98DE</i> Locus Encodes Four Protein Isoforms Homologous to the A1 Protein of Mammalian Heterogeneous Nuclear Ribonucleoprotein Complexes.</b> Susan R. Haynes, Gopa Raychaudhuri, and Ann L. Beyer ...	316-323
<b>Structure of Germ Line Immunoglobulin <math>\alpha</math> Heavy-Chain RNA and Its Location on Polysomes.</b> Gail Radcliffe, Yi-Chaung Lin, Martin Julius, Kenneth B. Marcu, and Janet Stavnezer.....	382-386
<b>Copy Choice Mechanism of Immunoglobulin Heavy-Chain Switch Recombination.</b> Wesley Dunnick and Janet Stavnezer .....	397-400

Date of Issue: 19 December 1989
