

MOLECULAR AND CELLULAR BIOLOGY

Volume 10

March 1990

No. 3

GENE EXPRESSION

- Drosophila* Proliferating Cell Nuclear Antigen (Cyclin) Gene: Structure, Expression during Development, and Specific Binding of Homeodomain Proteins to Its 5'-Flanking Region.** Masamitsu Yamaguchi, Yasuyoshi Nishida, Tetsuya Moriuchi, Fumiko Hirose, Chi-chung Hui, Yoshiaki Suzuki, and Akio Matsukage 872-879
- A Yeast *ARS*-Binding Protein Activates Transcription Synergistically in Combination with Other Weak Activating Factors.** Andrew R. Buchman and Roger D. Kornberg 887-897
- Two Forms of *Drosophila melanogaster* $Gs\alpha$ Are Produced by Alternate Splicing Involving an Unusual Splice Site.** Franklin Quan and Michael A. Forte.... 910-917
- Regulation of *Dd*rasG Gene Expression during *Dictyostelium* Development.** Meenal Khosla, Stephen M. Robbins, George B. Spiegelman, and Gerald Weeks 918-922
- Human Erythropoietin Gene Expression in Transgenic Mice: Multiple Transcription Initiation Sites and *cis*-Acting Regulatory Elements.** Gregg L. Semenza, Raquel C. Dureza, Monica D. Traystman, John D. Gearhart, and Stylianos E. Antonarakis 930-938
- Capping of Mammalian U6 Small Nuclear RNA In Vitro Is Directed by a Conserved Stem-Loop and AUAUAC Sequence: Conversion of a Noncapped RNA into a Capped RNA.** Ravinder Singh, Shashi Gupta, and Ram Reddy 939-946
- Enhancer and Promoter Elements from Simian Virus 40 and Polyomavirus Can Substitute for an Upstream Activation Sequence in *Saccharomyces cerevisiae*.** Nancy J. Axelrod, Gordon G. Carmichael, and Philip J. Farabaugh 947-957
- Functional Cooperation of Lens-Specific and Nonspecific Elements in the $\delta 1$ -Crystallin Enhancer.** Koji Goto, T. S. Okada, and Hisato Kondoh 958-964
- Two DNA-Binding Proteins Discriminate between the Promoters of Different Members of the Major Histocompatibility Complex Class II Multigene Family.** Michel Kobr, Walter Reith, Carlos Herrero-Sanchez, and Bernard Mach 965-971
- A Directly Repeated Sequence in the β -Globin Promoter Regulates Transcription in Murine Erythroleukemia Cells.** Laura L. Stuve and Richard M. Myers 972-981
- The Ubiquitous Octamer-Binding Protein(s) Is Sufficient for Transcription of Immunoglobulin Genes.** David G. Johnson, Leon Carayannopoulos, J. Donald Capra, Philip W. Tucker, and Jeffrey H. Hanke 982-990
- Binding of a Liver-Specific Factor to the Human Albumin Gene Promoter and Enhancer.** Monique Frain, Elizabeth Hardon, Gennaro Ciliberto, and José M. Sala-Trepat 991-999
- RNA Polymerase II Mutants Defective in Transcription of a Subset of Genes.** Charles Scafe, Michael Nonet, and Richard A. Young 1010-1016
- An Inducible 50-Kilodalton NF κ B-Like Protein and a Constitutive Protein Both Bind the Acute-Phase Response Element of the Angiotensinogen Gene.** David Ron, Allan R. Brasier, Kathy A. Wright, James E. Tate, and Joel F. Habener 1023-1032

Continued on following page

Extinction and Activation of the Thyroglobulin Promoter in Hybrids of Differentiated and Transformed Thyroid Cells. Ian Marc Bonapace, Massimo Sanchez, Silvana Obici, Adriana Gallo, Silvio Garofalo, Raffaele Gentile, Sergio Cocozza, and Enrico V. Avvedimento	1033–1040
Analysis of Multiple Forms of Nuclear Factor I in Human and Murine Cell Lines. Neerja Goyal, Jennifer Knox, and Richard M. Gronostajski	1041–1048
A Highly Specific Phosphatase from <i>Saccharomyces cerevisiae</i> Implicated in tRNA Splicing. Stephen M. McCraith and Eric M. Phizicky	1049–1055
<i>nit-2</i>, the Major Nitrogen Regulatory Gene of <i>Neurospora crassa</i>, Encodes a Protein with a Putative Zinc Finger DNA-Binding Domain. Ying-Hui Fu and George A. Marzluf	1056–1065
Immunoglobulin Heavy-Chain Enhancer Is Required To Maintain Transfected γ2A Gene Expression in a Pre-B-Cell Line. Barbara Porton, Dennis M. Zaller, Rebecca Lieberson, and Laurel A. Eckhardt	1076–1083
Characterization of Human Myosin Light Chains 1sa and 3nm: Implications for Isoform Evolution and Function. Deborah L. Hailstones and Peter W. Gunning	1095–1104
Roles of Fetal γ-Globin Promoter Elements and the Adult β-Globin 3' Enhancer in the Stage-Specific Expression of Globin Genes. Carlos Perez-Stable and Frank Costantini	1116–1125
Serum Stimulation of the <i>c-fos</i> Enhancer Induces Reversible Changes in <i>c-fos</i> Chromatin Structure. Junli Feng and Bryant Villeponteau	1126–1133
Bidirectional RNA Helicase Activity of Eucaryotic Translation Initiation Factors 4A and 4F. Florence Rozen, Isaac Edery, Karen Meerovitch, Thomas E. Dever, William C. Merrick, and Nahum Sonenberg	1134–1144
Depletion of U14 Small Nuclear RNA (snR128) Disrupts Production of 18S rRNA in <i>Saccharomyces cerevisiae</i>. Haodong V. Li, John Zagorski, and Maurille J. Fournier	1145–1152
Three Hamster Species with Different Scrapie Incubation Times and Neuropathological Features Encode Distinct Prion Proteins. Daniel H. Lowenstein, Darel A. Butler, David Westaway, Michael P. McKinley, Stephen J. DeArmond, and Stanley B. Prusiner	1153–1163
Promoter and 11-Kilobase Upstream Enhancer Elements Responsible for Hepatoma Cell-Specific Expression of the Rat Ornithine Transcarbamylase Gene. Takashi Murakami, Atsushi Nishiyori, Masaki Takiguchi, and Masataka Mori	1180–1191
Expression of a Foreign Gene in a Line of Transgenic Mice Is Modulated by a Chromosomal Position Effect. Raya Al-Shawi, Jane Kinnaird, Joanne Burke, and John O. Bishop	1192–1198
Correlation between Patterns of DNase I-Hypersensitive Sites and Upstream Promoter Activity of the Human ϵ-Globin Gene at Different Stages of Erythroid Development. Pierre Bushel, Kim Rego, Laurel Mendelsohn, and Maggi Allan	1199–1208
Negative Regulation of the Human ϵ-Globin Gene by Transcriptional Interference: Role of an Alu Repetitive Element. Jing Wu, G. Joan Grindlay, Pierre Bushel, Laurel Mendelsohn, and Maggi Allan	1209–1216
The PRP4 (RNA4) Protein of <i>Saccharomyces cerevisiae</i> Is Associated with the 5' Portion of the U4 Small Nuclear RNA. Yan Xu, Sara Petersen-Björn, and James D. Friesen	1217–1225

Arginine-Specific Repression in <i>Saccharomyces cerevisiae</i>: Kinetic Data on <i>ARG1</i> and <i>ARG3</i> mRNA Transcription and Stability Support a Transcriptional Control Mechanism. Marjolaine Crabeel, Robert Lavalle, and Nicolas Glansdorff	1226–1233
Induction of Albumin Gene Transcription in Hepatocytes by Extracellular Matrix Proteins. Joan M. Caron	1239–1243
A Multicomponent Complex Is Required for the AAUAAA-Dependent Cross-Linking of a 64-Kilodalton Protein to Polyadenylation Substrates. Jeffrey Wilusz, Thomas Shenk, Yoshio Takagaki, and James L. Manley	1244–1248
Identification, Nuclear Localization, and DNA-Binding Activity of the Zinc Finger Protein Encoded by the <i>Evi-1</i> Myeloid Transforming Gene. Takayasu Matsugi, Kazuhiro Morishita, and James N. Ihle	1259–1264
The <i>c-myc</i>-Regulated Gene <i>mr1</i> Encodes Plasminogen Activator Inhibitor 1. George C. Prendergast, Lisa E. Diamond, Douglas Dahl, and Michael D. Cole	1265–1269
Conditional Mutations Occur Predominantly in Highly Conserved Residues of RNA Polymerase II Subunits. Charles Scafe, Christopher Martin, Michael Nonet, Steven Podos, Sara Okamura, and Richard A. Young	1270–1275
NF-κB as Inducible Transcriptional Activator of the Granulocyte-Macrophage Colony-Stimulating Factor Gene. Ralf Schreck and Patrick A. Baeuerle	1281–1286
Nuclear Transport of Proteins Translated In Vitro from SP6 Plasmid-Generated mRNAs. Veena K. Parnaik and P. Kavin Kennady	1287–1292
Octamer-Binding Proteins in Diverse Hemopoietic Cells. Peter N. Cockerill and S. Peter Klinken	1293–1296

CELL GROWTH AND DEVELOPMENT

Modulation of Maturation and Ribosomal Protein S6 Phosphorylation in <i>Xenopus</i> Oocytes by Microinjection of Oncogenic <i>ras</i> Protein and Protein Kinase C. T. Kamata and H.-F. Kung	880–886
Vanadate-Resistant Mutants of <i>Saccharomyces cerevisiae</i> Show Alterations in Protein Phosphorylation and Growth Control. Cynthia Kanik-Ennulat and Norma Neff	898–909
Role of Phosphatidylinositide Metabolism in <i>ras</i>-Induced <i>Xenopus</i> Oocyte Maturation. Bin-Tao Pan and Geoffrey M. Cooper	923–929
The <i>src</i> Protein Contains Multiple Domains for Specific Attachment to Membranes. J. M. Kaplan, H. E. Varmus, and J. M. Bishop	1000–1009
Association of Catalytic and Regulatory Subunits of Cyclic AMP-Dependent Protein Kinase Requires a Negatively Charged Side Group at a Conserved Threonine. Lonny R. Levin and Mark J. Zoller	1066–1075
Mutational Analysis of the SNF3 Glucose Transporter of <i>Saccharomyces cerevisiae</i>. Linda Marshall-Carlson, John L. Celenza, Brehon C. Laurent, and Marian Carlson	1105–1115
Tyrosine Phosphorylation Is an Early and Specific Event Involved in Primary Keratinocyte Differentiation. Ellen Filvaroff, David F. Stern, and G. Paolo Dotto	1164–1173
Phosphorylation of the ETS-2 Protein: Regulation by the T-Cell Antigen Receptor-CD3 Complex. Shigeyoshi Fujiwara, Shigeki Koizumi, Robert J. Fisher, Narayan K. Bhat, and Takis S. Papas	1249–1253

Continued from preceding page

Inhibition of Epidermal Growth Factor Receptor Biosynthesis Caused by the <i>src</i> Oncogene Product, pp60^{v-src}. William J. Wasilenko, Mukund Nori, Nile Testerman, and Michael J. Weber	1254–1258
Tumor Necrosis Factor Induces the Rapid Phosphorylation of the Mammalian Heat Shock Protein hsp28. Andre-Patrick Arrigo.....	1276–1280
Release of Two <i>Saccharomyces cerevisiae</i> Cytochrome Genes, <i>COX6</i> and <i>CYC1</i>, from Glucose Repression Requires the <i>SNF1</i> and <i>SSN6</i> Gene Products. Richard M. Wright and Robert O. Poyton	1297–1300

CELL AND ORGANELLE STRUCTURE AND ASSEMBLY

Members of the 70-Kilodalton Heat Shock Protein Family Contain a Highly Conserved Calmodulin-Binding Domain. Mary Ann Stevenson and Stuart K. Calderwood	1234–1238
---	-----------

CHROMOSOME STRUCTURE AND DYNAMICS

A Retrotransposable Element from the Mosquito <i>Anopheles gambiae</i>. Nora J. Besansky	863–871
Mutations in <i>RAD6</i>, a Yeast Gene Encoding a Ubiquitin-Conjugating Enzyme, Stimulate Retrotransposition. Susan Picologlou, Nina Brown, and Susan W. Liebman.....	1017–1022
Stable Transfection of the Human Parasite <i>Leishmania major</i> Delineates a 30-Kilobase Region Sufficient for Extrachromosomal Replication and Expression. Geoffrey M. Kapler, Cara M. Coburn, and Stephen M. Beverley....	1084–1094
In Vivo Analysis of the <i>Saccharomyces cerevisiae</i> HO Nuclease Recognition Site by Site-Directed Mutagenesis. Jac A. Nickoloff, Jeffrey D. Singer, and Fred Heffron	1174–1179

Date of Issue: 19 February 1990
