

MOLECULAR AND CELLULAR BIOLOGY

Volume 11

August 1991

No. 8

GENE EXPRESSION

- Diverse Gene Sequences Are Overexpressed in Werner Syndrome Fibroblasts Undergoing Premature Replicative Senescence.** Shunichi Murano, Ray Thweatt, Robert J. Shmookler Reis, Richard A. Jones, Elena J. Moerman, and Samuel Goldstein 3905–3914
- Binding Sites of the 9- and 14-Kilodalton Heterodimeric Protein Subunit of the Signal Recognition Particle (SRP) Are Contained Exclusively in the *Alu* Domain of SRP RNA and Contain a Sequence Motif That Is Conserved in Evolution.** Katharina Strub, Jennifer Moss, and Peter Walter 3949–3959
- The *Neurospora crassa* *cyt-20* Gene Encodes Cytosolic and Mitochondrial Valyl-tRNA Synthetases and May Have a Second Function in Addition to Protein Synthesis.** Anne R. Kubelik, Beatrice Turcq, and Alan M. Lambowitz.... 4022–4035
- HSP47: a Tissue-Specific, Transformation-Sensitive, Collagen-Binding Heat Shock Protein of Chicken Embryo Fibroblasts.** Kazunori Hirayoshi, Hitoshi Kudo, Hajime Takechi, Akira Nakai, Akihiro Iwamatsu, Kenneth M. Yamada, and Kazuhiro Nagata 4036–4044
- A Negative Regulator of *HO* Transcription, SIN1 (SPT2), Is a Nonspecific DNA-Binding Protein Related to HMG1.** Warren Kruger and Ira Herskowitz ... 4135–4146
- The Mitochondrial Uncoupling Protein Gene in Brown Fat: Correlation between DNase I Hypersensitivity and Expression in Transgenic Mice.** Bert B. Boyer and Leslie P. Kozak 4147–4156
- Analysis of cDNAs of the Proto-Oncogene *c-src*: Heterogeneity in 5' Exons and Possible Mechanism for the Genesis of the 3' End of *v-src*.** Thambi Dorai, Joan B. Levy, Lily Kang, Joan S. Brugge, and Lu-Hai Wang 4165–4176
- Identification of mRNAs Associated with Programmed Cell Death in Immature Thymocytes.** Gregory P. Owens, William E. Hahn, and J. John Cohen.... 4177–4188
- Isolation and Characterization of a New Mutant Human Cell Line Unresponsive to Alpha and Beta Interferons.** Joseph John, Roslyn McKendry, Sandra Pellegrini, David Flavell, Ian M. Kerr, and George R. Stark 4189–4195
- The Herpes Simplex Virus Type 1 Thymidine Kinase Is Expressed in the Testes of Transgenic Mice under the Control of a Cryptic Promoter.** Raya Al-Shawi, Joanne Burke, Helen Wallace, Cheryl Jones, Stephen Harrison, David Buxton, Stephen Maley, Ann Chandley, and John O. Bishop 4207–4216
- Striking Similarities between the Regulatory Mechanisms Governing Yeast Mating-Type Genes and Mammalian Major Histocompatibility Complex Genes.** Jocelyn D. Weissman and Dinah S. Singer..... 4228–4234

TRANSCRIPTIONAL REGULATION

- The Early Response Gene NGFI-C Encodes a Zinc Finger Transcriptional Activator and Is a Member of the GCGGGGCG (GSG) Element-Binding Protein Family.** Seth D. Crosby, John J. Puetz, Kelli S. Simburger, Timothy J. Fahrner, and Jeffrey Milbrandt 3835–3841
- The B-Cell and Neuronal Forms of the Octamer-Binding Protein Oct-2 Differ in DNA-Binding Specificity and Functional Activity.** C. L. Dent, K. A. Lillycrop, J. K. Estridge, N. S. B. Thomas, and D. S. Latchman 3925–3930

Continued on following page

Displacement of <i>Xenopus</i> Transcription Factor IIIA from a 5S rRNA Gene by a Transcribing RNA Polymerase. Frank E. Campbell, Jr. and David R. Setzer	3978–3986
Transcription Factors Nuclear Factor I and Sp1 Interact with the Murine Collagen α1(I) Promoter. Michael C. Nehls, Richard A. Rippe, Linda Veloz, and David A. Brenner	4065–4073
The Immunosuppressant FK-506 Specifically Inhibits Mitogen-Induced Activation of the Interleukin-2 Promoter and the Isolated Enhancer Elements NFIL-2A and NF-AT1. Sunandita S. Banerji, Janey N. Parsons, and Michael J. Tocci	4074–4087
Antagonism between Retinoic Acid Receptors. Matthias Husmann, Jürgen Lehmann, Birgit Hoffmann, Thomas Hermann, Maty Tzukerman, and Magnus Pfahl	4097–4103
Cyclic Amplification and Selection of Targets (CASTing) for the Myogenin Consensus Binding Site. Woodring E. Wright, Michael Binder, and Walter Funk	4104–4110
SHI, a New Yeast Gene Affecting the Spacing between TATA and Transcription Initiation Sites. Elizabeth M. Furter-Graves, Rolf Furter, and Benjamin D. Hall	4121–4127
Functional Characterization of the Human Hypoxanthine Phosphoribosyltransferase Gene Promoter: Evidence for a Negative Regulatory Element. Diego E. Rincón-Limas, David A. Krueger, and Pragna I. Patel	4157–4164
A Complex Regulatory DNA Element Associated with a Major Histocompatibility Complex Class I Gene Consists of Both a Silencer and an Enhancer. Jocelyn D. Weissman and Dinah S. Singer	4217–4227
Identification of an Enhancer Required for the Expression of a Mouse Major Urinary Protein Gene in the Submaxillary Gland. Hyeung Jin Son, Karen Shahan, Marianne Rodriguez, Eva Derman, and Frank Costantini	4244–4252
Editing of Pre-mRNAs Can Occur before <i>cis</i>- and <i>trans</i>-Splicing in <i>Petunia</i> Mitochondria. Claudia A. Sutton, Patricia L. Conklin, Kim D. Pruitt, and Maureen R. Hanson	4274–4277
RNA Editing Intermediates of <i>cox2</i> Transcripts in Maize Mitochondria. Austin J. Yang and R. Michael Mulligan	4278–4281

CELL GROWTH AND DEVELOPMENT

Ribosomal Protein Genes Are Overexpressed in Colorectal Cancer: Isolation of a cDNA Clone Encoding the Human S3 Ribosomal Protein. Kay Pogue-Geile, John R. Geiser, Min Shu, Carla Miller, Ira G. Wool, Arnold I. Meisler, and James M. Pipas	3842–3849
Phosphorylation of <i>Xenopus</i> Cyclins B1 and B2 Is Not Required for Cell Cycle Transitions. Tetsuro Izumi and James L. Maller	3860–3867
Maturation and Function of Cystic Fibrosis Transmembrane Conductance Regulator Variants Bearing Mutations in Putative Nucleotide-Binding Domains 1 and 2. Richard J. Gregory, Devra P. Rich, Seng H. Cheng, David W. Souza, Sucharita Paul, Parthasarathy Manavalan, Matthew P. Anderson, Michael J. Welsh, and Alan E. Smith	3886–3893
Overexpression of <i>RP11</i>, a Novel Inhibitor of the Yeast Ras-Cyclic AMP Pathway, Down-Regulates Normal but Not Mutationally Activated Ras Function. Jae-Hong Kim and Scott Powers	3894–3904

Isolation and Characterization of <i>Drosophila</i> Multidrug Resistance Gene Homologs. C.-Ting Wu, Mark Budding, Mary S. Griffin, and James M. Croop	3940–3948
A Novel Ca²⁺/Calmodulin-Dependent Protein Kinase and a Male Germ Cell-Specific Calmodulin-Binding Protein Are Derived from the Same Gene. Anthony R. Means, Francisco Cruzalegui, Brigitte LeMagueresse, David S. Needleman, Gayle R. Slaughter, and Tomio Ono	3960–3971
Protein Truncation Is Required for the Activation of the <i>c-myb</i> Proto-Oncogene. Friedrich A. Grässer, Thomas Graf, and Joseph S. Lipsick	3987–3996
Identification of Amino Acid Residues Required for Ras p21 Target Activation. Mark S. Marshall, Lenora J. Davis, Robert D. Keys, Scott D. Mosser, Wendy S. Hill, Edward M. Scolnick, and Jackson B. Gibbs	3997–4004
The Proliferative and Morphologic Responses of a Colon Carcinoma Cell Line (LIM 1215) Require the Production of Two Autocrine Factors. Andrew M. Sizeland and Antony W. Burgess	4005–4014
Intrachromosomal Rearrangements Fusing <i>L-myc</i> and <i>rlf</i> in Small-Cell Lung Cancer. Tomi P. Mäkelä, Juha Kere, Robert Winqvist, and Kari Alitalo	4015–4021
The <i>Saccharomyces cerevisiae</i> <i>YAK1</i> Gene Encodes a Protein Kinase That Is Induced by Arrest Early in the Cell Cycle. Stephen Garrett, Marisa M. Menold, and James R. Broach	4045–4052
Dominant Inhibitory Ras Mutants Selectively Inhibit the Activity of Either Cellular or Oncogenic Ras. Dennis W. Stacey, Larry A. Feig, and Jackson B. Gibbs	4053–4064
Structure and Transforming Potential of the Human <i>cot</i> Oncogene Encoding a Putative Protein Kinase. Jun Miyoshi, Takatsugu Higashi, Hiroyuki Mukai, Tohru Ohuchi, and Takeo Kakunaga	4088–4096
The Highly Conserved N-Terminal Domains of Histones H3 and H4 Are Required for Normal Cell Cycle Progression. Brian A. Morgan, Barbara A. Mittman, and M. Mitchell Smith	4111–4120
The <i>AGA1</i> Product Is Involved in Cell Surface Attachment of the <i>Saccharomyces cerevisiae</i> Cell Adhesion Glycoprotein α-Agglutinin. Amit Roy, Cha Fen Lu, Donna L. Marykwas, Peter N. Lipke, and Janet Kurjan	4196–4206
E1A Induces Phosphorylation of the Retinoblastoma Protein Independently of Direct Physical Association between the E1A and Retinoblastoma Products. Hwei-Gene Heidi Wang, Giulio Draetta, and Elizabeth Moran	4253–4265
Constant Expression and Activity of Protein Phosphatase 2A in Synchronized Cells. Ralf Ruediger, Jill E. Van Wart Hood, Marc Mumby, and Gernot Walter	4282–4285

CELL AND ORGANELLE STRUCTURE AND ASSEMBLY

Viability of Clathrin Heavy-Chain-Deficient <i>Saccharomyces cerevisiae</i> Is Compromised by Mutations at Numerous Loci: Implications for the Suppression Hypothesis. Alan L. Munn, Linda Silveira, Marc Elgort, and Gregory S. Payne	3868–3878
Atypical Mannolipids Characterize Thy-1-Negative Lymphoma Mutants. P. Lemansky, D. K. Gupta, S. Meyale, G. Tucker, and A. M. Tartakoff	3879–3885
In Vivo Assembly of Yeast Mitochondrial α-Ketoglutarate Dehydrogenase Complex. Barbara Repetto and Alexander Tzagoloff	3931–3939

Cloning and Characterization of a Gene Which Determines Osmotic Stability in <i>Saccharomyces cerevisiae</i>. Lubomira I. Stateva, Stephen G. Oliver, Laurence J. Trueman, and Pencho V. Venkov	4235–4243
<i>TRK1</i> and <i>TRK2</i> Encode Structurally Related K⁺ Transporters in <i>Saccharomyces cerevisiae</i>. Christopher H. Ko and Richard F. Gaber.....	4266–4273

DNA DYNAMICS AND CHROMOSOME STRUCTURE

Chromosome Structure: DNA Nucleotide Sequence Elements of a Subset of the Minichromosomes of the Protozoan <i>Trypanosoma brucei</i>. Michael Weiden, Yvonne N. Osheim, Ann L. Beyer, and Lex H. T. Van der Ploeg.....	3823–3834
Mapping of Replication Initiation Sites in Mammalian Genomes by Two-Dimensional Gel Analysis: Stabilization and Enrichment of Replication Intermediates by Isolation on the Nuclear Matrix. P. A. Dijkwel, J. P. Vaughn, and J. L. Hamlin	3850–3859
A Novel, Plasmid-Based System for Studying Gene Rearrangements in Mammalian Cells. Robert S. Krauss and I. Bernard Weinstein	3915–3924
V(D)J Recombination: Evidence that a Replicative Mechanism Is Not Required. Chih-Lin Hsieh, R. Patrick McCloskey, Eric Radany, and Michael R. Lieber	3972–3977
Xeroderma Pigmentosum Complementation Group C Cells Remove Pyrimidine Dimers Selectively from the Transcribed Strands of Active Genes. Jaap Venema, Anneke van Hoffen, Veronika Karcagi, A. T. Natarajan, Albert A. van Zeeland, and Leon H. F. Mullenders.....	4128–4134

ERRATUM

<i>SPT5</i>, an Essential Gene Important for Normal Transcription in <i>Saccharomyces cerevisiae</i>, Encodes an Acidic Nuclear Protein with a Carboxy-Terminal Repeat. Michele S. Swanson, Elizabeth A. Malone, and Fred Winston.....	4286
---	------
