

MOLECULAR AND CELLULAR BIOLOGY

Volume 12

January 1992

No. 1

GENE EXPRESSION

- GLC3* and *GHA1* of *Saccharomyces cerevisiae* Are Allelic and Encode the Glycogen Branching Enzyme** Donald W. Rowen, Marilyn Meinke, and David C. LaPorte 22–29
- An Intergenic G-Rich Region in *Leishmania tarentolae* Kinetoplast Maxicircle DNA Is a Pan-Edited Cryptogene Encoding Ribosomal Protein S12** Dmitri A. Maslov, Nancy R. Sturm, Bettina M. Niner, Eileen S. Gruszynski, Marian Peris, and Larry Simpson 56–67
- Lipopolysaccharide-Induced NF- κ B Activation in Mouse 70Z/3 Pre-B Lymphocytes Is Inhibited by Mevinolin and 5'-Methylthioadenosine: Roles of Protein Isoprenylation and Carboxyl Methylation Reactions** Ronald E. Law, Julie B. Stimmel, Michael A. Damore, Carla Carter, Steven Clarke, and Randolph Wall 103–111
- A Mouse Oocyte-Specific Protein That Binds to a Region of mZP3 Promoter Responsible for Oocyte-Specific mZP3 Gene Expression** Michael Schickler, Sergio A. Lira, Ross A. Kinloch, and Paul M. Wassarman 120–127
- Characterization and Primary Structure of the Poly(C)-Binding Heterogeneous Nuclear Ribonucleoprotein Particle K Protein** Michael J. Matunis, W. Matthew Michael, and Gideon Dreyfuss 164–171
- Mechanism of Translation of Monocistronic and Multicistronic Human Immunodeficiency Virus Type 1 mRNAs** Stefan Schwartz, Barbara K. Felber, and George N. Pavlakis 207–219
- Selective Activation of a Discrete Family of Endogenous Proviral Elements in Normal BALB/c Lymphocytes** Judy A. Mietz, Joseph W. Fewell, and Edward L. Kuff 220–228
- The *suil* Suppressor Locus in *Saccharomyces cerevisiae* Encodes a Translation Factor That Functions during tRNA^{Met} Recognition of the Start Codon** Heejeong Yoon and Thomas F. Donahue 248–260
- Ornithine Decarboxylase Gene of *Neurospora crassa*: Isolation, Sequence, and Polyamine-Mediated Regulation of Its mRNA** Laura J. Williams, Glenn R. Barnett, Janet L. Ristow, John Pitkin, Michel Perriere, and Rowland H. Davis 347–359

TRANSCRIPTIONAL REGULATION

- Interferon Induction of Gene Transcription Analyzed by In Vivo Footprinting** Jovan Mirkovitch, Thomas Decker, and James E. Darnell, Jr. 1–9
- The General Transcription Factor RAP30 Binds to RNA Polymerase II and Prevents It from Binding Nonspecifically to DNA** Marie T. Killeen and Jack F. Greenblatt 30–37
- Cloning of a Negative Transcription Factor That Binds to the Upstream Conserved Region of Moloney Murine Leukemia Virus** James R. Flanagan, Kevin G. Becker, David L. Ennist, Shannon L. Gleason, Paul H. Driggers, Ben-Zion Levi, Ettore Appella, and Keiko Ozato 38–44
- Characterization of the DNA Target Site for the Yeast ARGR Regulatory Complex, a Sequence Able To Mediate Repression or Induction by Arginine** M. De Rijcke, S. Seneca, B. Punyammalee, N. Glansdorff, and M. Crabeel 68–81
- Purification of Core-Binding Factor, a Protein That Binds the Conserved Core Site in Murine Leukemia Virus Enhancers** Shuwen Wang and Nancy A. Speck 89–102

The Cellular Oncogene <i>c-myb</i> Can Interact Synergistically with the Epstein-Barr Virus BZLF1 Transactivator in Lymphoid Cells	Shannon C. Kenney, Elizabeth Holley-Guthrie, E. Byrd Quinlivan, David Gutsch, Qin Zhang, Tim Bender, Jean-Francois Giot, and Alain Sergeant	136-146
The Basic Region of Myogenin Cooperates with Two Transcription Activation Domains To Induce Muscle-Specific Transcription	John J. Schwarz, Tushar Chakraborty, James Martin, Jumin Zhou, and Eric N. Olson	266-275
Divergent Regulation of the Human Atrial Natriuretic Peptide Gene by <i>c-jun</i> and <i>c-fos</i>	Branka Kovačić-Milivojević and David G. Gardner	292-301
Two Conserved Essential Motifs of the Murine Immunoglobulin λ Enhancers Bind B-Cell-Specific Factors	Charles M. Rudin and Ursula Storb	309-320
Molecular Characterization of the <i>lam</i> Locus and Sequences Involved in Regulation by the AmdR Protein of <i>Aspergillus nidulans</i>	Imogen B. Richardson, Margaret E. Katz, and Michael J. Hynes	337-346
PU.1 Recruits a Second Nuclear Factor to a Site Important for Immunoglobulin κ 3' Enhancer Activity	Jagan M. R. Pongubala, Sujatha Nagulapalli, Michael J. Klemsz, Scott R. McKercher, Richard A. Maki, and Michael L. Atchison	368-378
Factors Involved in Specific Transcription by Mammalian RNA Polymerase II: Purification and Analysis of Transcription Factor IIA and Identification of Transcription Factor IIJ	Patricia Cortes, Osvaldo Flores, and Danny Reinberg	413-421

CELL GROWTH AND DEVELOPMENT

Proviral Rearrangements and Overexpression of a New Cellular Gene (<i>nov</i>) in Myeloblastosis-Associated Virus Type 1-Induced Nephroblastomas	V. Joliot, C. Martinerie, G. Dambrine, G. Plassiart, M. Brisac, J. Crochet, and B. Perbal	10-21
Differential Splicing in the Extracellular Region of Fibroblast Growth Factor Receptor 1 Generates Receptor Variants with Different Ligand-Binding Specificities	Sabine Werner, Dah-Shuhn R. Duan, Carlie de Vries, Kevin G. Peters, Daniel E. Johnson, and Lewis T. Williams	82-88
A Site of Tyrosine Phosphorylation in the C Terminus of the Epidermal Growth Factor Receptor Is Required To Activate Phospholipase C	Quinn C. Vega, Claude Cochet, Odile Filhol, Chia-Ping Chang, Sue Goo Rhee, and Gordon N. Gill	128-135
Transgenes Expressing the <i>Wnt-1</i> and <i>int-2</i> Proto-Oncogenes Cooperate during Mammary Carcinogenesis in Doubly Transgenic Mice	Helen Kwan, Vladimir Pecenka, Ann Tsukamoto, Tristram G. Parslow, Raphael Guzman, Tzu-Ping Lin, William J. Muller, Frederick S. Lee, Philip Leder, and Harold E. Varmus	147-154
Dominant Mutations in a Gene Encoding a Putative Protein Kinase (<i>BCK1</i>) Bypass the Requirement for a <i>Saccharomyces cerevisiae</i> Protein Kinase C Homolog	Kyung S. Lee and David E. Levin	172-182
Expression of the <i>Evi-1</i> Zinc Finger Gene in 32Dcl3 Myeloid Cells Blocks Granulocytic Differentiation in Response to Granulocyte Colony-Stimulating Factor	Kazuhiro Morishita, Evan Parganas, Takayasu Matsugi, and James N. Ihle	183-189
Analysis of the Fibroblast Transformation Potential of GTPase-Deficient <i>gip2</i> Oncogenes	Sunil K. Gupta, Carme Gallego, Joseph M. Lowndes, Christopher M. Pleiman, Carol Sable, Bartholomew J. Eisfelder, and Gary L. Johnson	190-197
Oncogenes Result in Genomic Alterations That Activate a Transcriptionally Silent, Dominantly Selectable Reporter Gene (<i>neo</i>)	Reed E. Drews, Victor T.-W. Chan, and Lowell E. Schnipper	198-206

Continued from preceding page

Heparin Is Required for Cell-Free Binding of Basic Fibroblast Growth Factor to a Soluble Receptor and for Mitogenesis in Whole Cells	David M. Ornitz, Avner Yayon, John G. Flanagan, Carl M. Svahn, Ehud Levi, and Philip Leder	240–247
Evidence for the Involvement of Protein Kinase Activity in Transforming Growth Factor-β Signal Transduction	Masahiko Ohtsuki and Joan Massagué	261–265
Phospholipase C-Mediated Hydrolysis of Phosphatidylcholine Is a Target of Transforming Growth Factor β1 Inhibitory Signals	Maria T. Diaz-Meco, Isabel Dominguez, Laura Sanz, Maria M. Municio, Edurne Berra, Maria E. Cornet, Antonio Garcia de Herreros, Terje Johansen, and Jorge Moscat	302–308
The Mouse <i>Wnt-1</i> Gene Can Act Via a Paracrine Mechanism in Transformation of Mammary Epithelial Cells	Shall F. Jue, Roger S. Bradley, Julie A. Rudnicki, Harold E. Varmus, and Anthony M. C. Brown	321–328
Susceptibility to Cell Death Is a Dominant Phenotype: Triggering of Activation-Driven T-Cell Death Independent of the T-Cell Antigen Receptor Complex	Gigi Nickas, Jennifer Meyers, Leila D. Hebschi, Jonathan D. Ashwell, Daniel P. Gold, Beate Sydora, and David S. Ucker	379–385
A Colony-Stimulating Factor 1 (CSF-1) Receptor/Platelet-Derived Growth Factor-β Receptor Gene Fusion Confers CSF-1 Independence and Tumorigenicity on a <i>c-myc</i>-Immortalized Monocyte Cell Line	Michael R. Eccles, Frederick J. King, and Michael D. Cole	386–393
Altered Expression of Protein Kinase C, <i>lck</i>, and CD45 in a 12-<i>O</i>-Tetradecanoylphorbol-13-Acetate-Dependent Leukemic T-Cell Variant That Expresses a High Level of Interleukin-2 Receptor	Kam-Meng Tchou-Wong and I. Bernard Weinstein	394–401
Glucose Transporter Isoforms Switch in T-Antigen-Transformed Pancreatic β Cells Growing in Culture and in Mice	Michael Tal, Bernard Thorens, Manju Surana, Norman Fleischer, Harvey F. Lodish, Douglas Hanahan, and Shimon Efrat	422–432
CELL AND ORGANELLE STRUCTURE AND ASSEMBLY		
C-Terminal Sequences Can Inhibit the Insertion of Membrane Proteins into the Endoplasmic Reticulum of <i>Saccharomyces cerevisiae</i>	Neil Green and Peter Walter	276–282
<i>MASS</i>, a Yeast Homolog of <i>dnaJ</i> Involved in Mitochondrial Protein Import	David P. Atencio and Michael P. Yaffe	283–291
<i>NAM9</i> Nuclear Suppressor of Mitochondrial Oxidative Mutations in <i>Saccharomyces cerevisiae</i> Codes for a Protein Homologous to S4 Ribosomal Proteins from Chloroplasts, Bacteria, and Eucaryotes	Magdalena Boguta, Aleksandra Dmochowska, Piotr Borsuk, Katarzyna Wrobel, Ali Gargouri, Jaga Lazowska, Piotr P. Slonimski, Barbara Szczesniak, and Anna Kruszewska	402–412
DNA DYNAMICS AND CHROMOSOME STRUCTURE		
Chromosomal Organization of <i>Xenopus laevis</i> Oocyte and Somatic 5S rRNA Genes In Vivo	Constantin C. Chipev and Alan P. Wolffe	45–55
Test of the Double-Strand-Break Repair Model of Recombination in <i>Xenopus laevis</i> Oocytes	Sunjoo Jeong-Yu and Dana Carroll	112–119
Identification of Replication Factor C from <i>Saccharomyces cerevisiae</i>: A Component of the Leading-Strand DNA Replication Complex	Karen Fien and Bruce Stillman	155–163

Structure of DRE, a Retrotransposable Element Which Integrates with Position Specificity Upstream of *Dictyostelium discoideum* tRNA Genes

Rolf Marschalek, Jörg Hofmann, Gerald Schumann, Roger Gösseringer, and Theodor Dingermann

229–239

Single-Stranded DNA as a Recombination Substrate in Plants as Assessed by Stable and Transient Recombination Assays

Roland Bilang, Alex Peterhans, Augustyn Bogucki, and Jerzy Paszkowski

329–336

Gene Replacement with One-Sided Homologous Recombination

Neil Berinstein, Nancy Pennell, Clifford A. Ottaway, and Marc J. Shulman

360–367

ERRATUM

Gene Transfer by Retrovirus Vectors Occurs Only in Cells That Are Actively Replicating at the Time of Infection

Daniel G. Miller, Mohammed A. Adam, and A. Dusty Miller

433
