Molecular and Cellular Biology, a publication of the American Society for Microbiology (ASM), 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171, is devoted to the advancement and dissemination of fundamental knowledge concerning the molecular biology of eucaryotic cells, of both microbial and higher organisms. Instructions to authors are published in the January issue each year; reprints are available from the editors and the Journals Division. The journal is published monthly, one volume per year. The nonmember subscription prices are \$360 (U.S.), \$385 (Canada), and \$462 (other countries; air drop shipping) per year; single copies are \$42.80 (Canada) and \$40 (U.S. and other countries). The member subscription prices are \$79 (U.S.), \$85 (Canada), and \$104 (other countries; air drop shipping); single copies are \$10.70 (Canada) and \$10 (U.S. and other countries). Correspondence relating to subscriptions, defective copies, missing issues, and availability of back issues should be directed to the Subscriptions Department, ASM; correspondence relating to reprint orders should be directed to the Publication Sales Department, ASM; and correspondence relating to disposition of submitted manuscripts, proofs, and general editorial matters should be directed to the Journals Division, American Society for Microbiology, 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171. Phone: (202) 737-3600.

Claims for missing issues from residents of the United States, Canada, and Mexico must be submitted within 3 months after publication of the issues; residents of all other countries must submit claims within 6 months of publication of the issues. Claims for issues missing because of failure to report an address change or for issues "missing from files" will not be allowed.

Second-class postage paid at Washington, DC 20005, and at additional mailing offices.

POSTMASTER: Send address changes to *Molecular and Cellular Biology*, ASM, 1325 Massachusetts Ave., N.W., Washington, DC 20005-4171. Made in the United States of America. Printed on acid-free paper.

Human Genome

DISTINGUISHED Postdoctoral Fellowships

**Research Opportunities in Biology, Chemistry,
Physics, Mathematics, Engineering,
and Information Science**

- Research related to Human Genome Program
- Tenable at various national and university laboratories
- Stipends \$37,500
- Doctoral degree received after May 1, 1990
- U.S. citizens or permanent resident aliens eligible
- Deadline - February 1, 1993
- Information and applications:

RESEARCH ISSUES IN HUMAN BEHAVIOR AND SEXUALLY TRANSMITTED DISEASES IN THE AIDS ERA

Edited by Judith N. Wasserheit, Sevgi O. Aral, and King K. Holmes;
Associate editor, Penelope J. Hitchcock

This fascinating monograph is a collaborative effort by an interdisciplinary group of experts in behavioral sciences, sexually transmitted diseases (STDs), epidemiology, biostatistics, clinical trials, and health education from throughout the world, brought together under the auspices of the National Institute of Allergy and Infectious Diseases. Their common goal was to define a revolutionary new agenda for intervention-oriented behavioral research into the prevention and control of STDs, in both industrialized and developing countries, which addresses STD research through interdisciplinary approaches. This book is intended not only for established investigators but for students of a wide range of clinical and social sciences.

November 1991. Hardcover (ISBN 1-55581-036-5), 401 pages, illustrated, glossary, index.

Price: \$48.00. Canadian price (includes 7% G.S.T.): \$51.36.
Shipping charges (orders postmarked after 31 December 1991): U.S., 1-3 copies = \$1.50/book; 4+ copies = \$0.75/book. Non-U.S., 1-3 copies = \$2.50/book; 4+ copies = \$1.25/book. Offer number: MCB-036-5.

15 reasons

... why you should join your professional colleagues in the American Society for Microbiology, the world's largest single life science membership organization ...

- 1 Member rates on ASM journals
- 2 Member rates for all ASM meetings and conferences
- 3 A monthly subscription to *ASM News*
- 4 Member rates for all ASM books and laboratory manuals
- 5 Outstanding continuing educational workshops at member rates
- 6 Superb education materials including audioconferences
- 7 An influential voice in Washington with an effective public relations program
- 8 A year-round job placement service available to members at a nominal fee
- 9 Certification and registration programs through the National Registry of Microbiologists, the American Board of Medical Microbiology, and the American Board of Medical Laboratory Immunology
- 10 An honors and awards program
- 11 Current information on careers in microbiology and related fields
- 12 Optional life, disability, and health insurance for qualified members
- 13 An opportunity to network with your peers
- 14 A schedule for all local, regional, national, and international meetings involving microbiology, biology, and chemistry
- 15 An opportunity to participate in the scientific division of your choice and join over 39,000 members in the promotion of the microbiological sciences

If these 15 reasons (and there are many more) sound good to you, why not find out how you can join ASM today?

From eucaryotes to viruses...

depend on these two ASM journals
for cutting-edge science

Researchers find *Molecular and Cellular Biology* to be an authoritative source for the dissemination of fundamental knowledge and new developments in all aspects of the molecular biology of eucaryotic cells, of both microbial and higher organisms. The scope includes regulation of gene expression, transcription, cell growth and development, oncogenesis, cell and organelle structure and assembly, DNA replication and recombination, chromosome structure, and somatic cell genetics. The journal publishes work on microbial as well as higher organisms and on viral systems where the emphasis is clearly on the cell.

Editor in Chief: Alan M. Weiner

Editors: James R. Broach, Lawrence A. Chasin, David A. Clayton, Anita K. Hopper, Tony Hunter, Tom Kadesch, Robert E. Kingston, William J. McGinnis, Charles J. Sherr, Barbara Sollner-Webb, Shirley M. Tilghman, and Owen N. Witte

ISSN 0270-7306 • 7,000 pages/year • monthly • \$360.00 (U.S.A.) • \$385.00 (Canada) • \$462.00 (other countries; includes airdrop shipping). Add \$340.00 for airmail service outside the U.S.A. Advance payment in U.S. dollars, or MasterCard, VISA, American Express, or Eurocard charge instructions, required. Members of ASM may subscribe at \$79.00 (U.S.A.), \$85.00 (Canada), \$104.00 (other countries); limit is one personal subscription per member. Subscriptions start with the January issue. Call (202) 737-3600 to charge your order or FAX orders to (202) 737-0368. Purchase orders and other correspondence to Publication Sales at the address below.

The *Journal of Virology* maintains its premier position as a source of broad-based, high-quality, original research concerning viruses of bacteria, plants, and animals. Because viruses serve as vital tools for studying life processes at the cellular and subcellular levels, the journal is essential reading not only for virologists but for molecular and cellular biologists as well.

While many competing journals publish in narrowly specialized areas, JVI provides fundamental new information using cross-disciplinary approaches of biochemistry, biophysics, cell biology, genetics, immunology, molecular biology, morphology, physiology, and pathogenesis and immunity. More than a simple reporting of new data, the journal includes articles containing experimental observations which lead to innovative concepts and stimulate new directions for research.

Specific sections include: Viral and Cellular Oncogenes, Viral Pathogenesis and Immunity, Virus-Cell Interactions, Animal Viruses, Bacterial Viruses, Plant Viruses, and Protozoan and Fungal Viruses. Also included are minireviews.

Editor in Chief: Arnold J. Levine
