

MOLECULAR AND CELLULAR BIOLOGY

Volume 12

May 1992

No. 5

GENE EXPRESSION

- | | | |
|--|--|-----------|
| Human Papillomavirus Type 16 E7 Protein Inhibits DNA Binding by the Retinoblastoma Gene Product | Steven M. Stirdivant, Hans E. Huber, Denis R. Patrick, Deborah Defeo-Jones, Elizabeth M. McAvoy, Victor M. Garsky, Allen Oliff, and David C. Heimbrosk | 1905-1914 |
| The Signal for Glucose Repression of the Lactose-Galactose Regulon Is Amplified through Subtle Modulation of Transcription of the <i>Kluyveromyces lactis</i> <i>KI-GAL4</i> Activator Gene | Nadarajan Kuzhandaivelu, W. Keith Jones, Angela K. Martin, and Robert C. Dickson | 1924-1931 |
| Group II Introns Deleted for Multiple Substructures Retain Self-Splicing Activity | Jennifer L. Koch, Scott C. Boulanger, Sulayman D. Dib-Hajj, Sharda K. Hebbar, and Philip S. Perlman | 1950-1958 |
| Position Is the Critical Determinant for Function of Iron-Responsive Elements as Translational Regulators | Britta Goossen and Matthias W. Hentze | 1959-1966 |
| Guide RNAs for Transcripts with Developmentally Regulated RNA Editing Are Present in Both Life Cycle Stages of <i>Trypanosoma brucei</i> | Donna J. Koslowsky, George R. Riley, Jean E. Feagin, and Kenneth Stuart | 2043-2049 |
| Maxicircle <i>CRI</i> Transcripts of <i>Trypanosoma brucei</i> Are Edited and Developmentally Regulated and Encode a Putative Iron-Sulfur Protein Homologous to an NADH Dehydrogenase Subunit | Augustine E. Souza, Peter J. Myler, and K. Stuart | 2100-2107 |
| Cooperation of Pre-mRNA Sequence Elements in Splice Site Selection | Zbigniew Dominski and Ryszard Kole | 2108-2114 |
| Mechanism of Action of a Repressor of Dioxin-Dependent Induction of <i>Cyp1a1</i> Gene Transcription | A. J. Watson, K. I. Weir-Brown, R. M. Bannister, F.-F. Chu, S. Reisz-Porszasz, Y. Fujii-Kuriyama, K. Sogawa, and O. Hankinson | 2115-2123 |
| Tissue-Specific Gene Expression in the Pituitary: The Glycoprotein Hormone α-Subunit Gene Is Regulated by a Gonadotrope-Specific Protein | Friedemann Horn, Jolene J. Windle, Kerry M. Barnhart, and Pamela L. Mellon | 2143-2153 |
| SEN1, a Positive Effector of tRNA-Splicing Endonuclease in <i>Saccharomyces cerevisiae</i> | Douglas J. DeMarini, Mark Winey, Doris Ursic, Frances Webb, and Michael R. Culbertson | 2154-2164 |
| Gene Products That Promote mRNA Turnover in <i>Saccharomyces cerevisiae</i> | Peter Leeds, Jeffrey M. Wood, Bum-Soo Lee, and Michael R. Culbertson | 2165-2177 |
| Structural Elements of Ornithine Decarboxylase Required for Intracellular Degradation and Polyamine-Dependent Regulation | Lucy Ghoda, David Sidney, Madhu Macrae, and Philip Coffino | 2178-2185 |
| Selective Translational Control and Nonspecific Posttranscriptional Regulation of Ribosomal Protein Gene Expression during Development and Regeneration of Rat Liver | Ronit Aloni, David Peleg, and Oded Meyuhas | 2203-2212 |
| Expression of a 91-Kilodalton PEA3-Binding Protein Is Down-Regulated during Differentiation of F9 Embryonal Carcinoma Cells | M. E. Martin, X. Y. Yang, and W. R. Folk | 2213-2221 |
| Identification of a <i>cis</i>-Acting DNA Antisilencer Element Which Modulates Vimentin Gene Expression | Denise M. Stover and Zendra E. Zehner | 2230-2240 |

Continued on following page

Different Sequence Elements Are Required for Function of the Cauliflower Mosaic Virus Polyadenylation Site in <i>Saccharomyces cerevisiae</i> Compared with in Plants	Stefan Irniger, Hélène Sanfaçon, Christoph M. Egli, and Gerhard H. Braus	2322–2330
Residues Critical for Retroviral Integrative Recombination in a Region That Is Highly Conserved among Retroviral/Retrotransposon Integrases and Bacterial Insertion Sequence Transposases	Joseph Kulkosky, Kathryn S. Jones, Richard A. Katz, Joseph P. G. Mack, and Anna Marie Skalka	2331–2338
Structure and Expression of a Calcium-Binding Protein Gene Contained within a Calmodulin-Regulated Protein Kinase Gene	Mark Collinge, Paul E. Matrisian, Warren E. Zimmer, Rebecca L. Shattuck, Thomas J. Lukas, Linda J. Van Eldik, and D. Martin Watterson	2359–2371
Thyroid Hormone Receptor Transcriptional Activity Is Potentially Autoregulated by Truncated Forms of the Receptor	Jeannette Bigler, William Hokanson, and Robert N. Eisenman	2406–2417
TRANSCRIPTIONAL REGULATION		
Identification of the Promoter Region Involved in the Autoregulation of the Transcriptional Activator ALCR in <i>Aspergillus nidulans</i>	Peter Kulmburg, Daria Sequeval, François Lenouvel, Martine Mathieu, and Béatrice Felenbok	1932–1939
Only Two of the Five Zinc Fingers of the Eukaryotic Transcriptional Repressor PRDI-BF1 Are Required for Sequence-Specific DNA Binding	Andrew D. Keller and Tom Maniatis	1940–1949
Identification and Characterization of a Cardiac-Specific Transcriptional Regulatory Element in the Slow/Cardiac Troponin C Gene	Michael S. Parmacek, Anuradha J. Vora, Tingliang Shen, Eliav Barr, Frank Jung, and Jeffrey M. Leiden	1967–1976
In Vitro Activation of Transcription by the Human T-Cell Leukemia Virus Type I Tax Protein	Maura-Ann H. Matthews, Rhea-Beth Markowitz, and William S. Dynan	1986–1996
Identification of a Negative Regulatory Element That Inhibits <i>c-mos</i> Transcription in Somatic Cells	Sandra S. Zinkel, Subrata K. Pal, József Szeberényi, and Geoffrey M. Cooper	2029–2036
Binding of the Estrogen Receptor DNA-Binding Domain to the Estrogen Response Element Induces DNA Bending	Ann M. Nardulli and David J. Shapiro	2037–2042
Stability of <i>Drosophila</i> RNA Polymerase II Elongation Complexes In Vitro	Daniel D. Kephart, Nicholas F. Marshall, and David H. Price	2067–2077
Control of Formation of Two Distinct Classes of RNA Polymerase II Elongation Complexes	Nicholas F. Marshall and David H. Price	2078–2090
In Vivo Footprinting of the Human α-Globin Locus Upstream Regulatory Element by Guanine and Adenine Ligation-Mediated Polymerase Chain Reaction	Erich C. Strauss, Nancy C. Andrews, Douglas R. Higgs, and Stuart H. Orkin	2135–2142
Cell-Free System for Assembly of Transcriptionally Repressed Chromatin from <i>Drosophila</i> Embryos	Peter B. Becker and Carl Wu	2241–2249
The HIP1 Initiator Element Plays a Role in Determining the In Vitro Requirement of the Dihydrofolate Reductase Gene Promoter for the C-Terminal Domain of RNA Polymerase II	A. B. Buermeyer, N. E. Thompson, L. A. Strasheim, R. R. Burgess, and P. J. Farnham	2250–2259
Transcription Termination by RNA Polymerase III: Uncoupling of Polymerase Release from Termination Signal Recognition	Frank E. Campbell, Jr. and David R. Setzer	2260–2272
Synergistic Action of Interleukin-6 and Glucocorticoids Is Mediated by the Interleukin-6 Response Element of the Rat α_2 Macroglobulin Gene	Gertrud M. Hocke, David Barry, and Georg H. Fey	2282–2294
Regulation of Yeast <i>COX6</i> by the General Transcription Factor ABF1 and Separate HAP2- and Heme-Responsive Elements	John D. Trawick, Norbert Kraut, Francis R. Simon, and Robert O. Poyton	2302–2314

Continued from preceding page

- The -6.1-Kilobase Chicken Lysozyme Enhancer Is a Multifactorial Complex Containing Several Cell-Type-Specific Elements** Thomas Grewal, Manfred Theisen, Uwe Borgmeyer, Thomas Grussenmeyer, Ralph A. W. Rupp, Aribert Stief, Feng Qian, Andreas Hecht, and Albrecht E. Sippel 2339-2350
- Biochemical and Genetic Characterization of a Yeast TFIID Mutant That Alters Transcription In Vivo and DNA Binding In Vitro** Karen M. Arndt, Stephanie L. Ricupero, David M. Eisenmann, and Fred Winston 2372-2382
- B-Cell Factor 1 Is Required for Optimal Expression of the DRA Promoter in B Cells** C. F. Voliva, A. Aronheim, M. D. Walker, and B. Matija Peterlin 2383-2390
- Expression Cloning of a Novel Zinc Finger Protein That Binds to the *c-fos* Serum Response Element** Ricardo M. Attar and Michael Z. Gilman 2432-2443

CELL GROWTH AND DEVELOPMENT

- A G-Protein α Subunit from Asexual *Candida albicans* Functions in the Mating Signal Transduction Pathway of *Saccharomyces cerevisiae* and Is Regulated by the $\alpha 1$ - $\alpha 2$ Repressor** Chanchal Sadhu, Denise Hoekstra, Michael J. McEachern, Steven I. Reed, and James B. Hicks 1977-1985
- Protein Tyrosine Kinase Activities of the Epidermal Growth Factor Receptor and ErbB Proteins: Correlation of Oncogenic Activation with Altered Kinetics** N. Nair, R. J. Davis, and H. L. Robinson 2010-2016
- Mutational and Kinetic Analyses of the GTPase-Activating Protein (GAP)-p21 Interaction: The C-Terminal Domain of GAP Is Not Sufficient for Full Activity** Petra Gideon, Jacob John, Matthias Frech, Alfred Lautwein, Robin Clark, Julie E. Scheffler, and Alfred Wittinghofer 2050-2056
- A Single β -Globin Locus Control Region Element (5' Hypersensitive Site 2) Is Sufficient for Developmental Regulation of Human Globin Genes in Transgenic Mice** B. J. Morley, C. A. Abbott, J. A. Sharpe, J. Lida, P. S. Chan-Thomas, and W. G. Wood 2057-2066
- The *Saccharomyces cerevisiae* *CDC25* Gene Product Binds Specifically to Catalytically Inactive Ras Proteins In Vivo** Thomas Munder and Peter Fürst 2091-2099
- Basic Fibroblast Growth Factor Enhances Nerve Growth Factor Receptor Gene Promoter Activity in Human Neuroblastoma Cell Line CHP100** Mutsuo Taiji, Kazuko Taiji, Karen L. Deyerle, and Mark Bothwell 2193-2202
- Growth Factor-Induced Activation of a Kinase Activity Which Causes Regulatory Phosphorylation of p42/Microtubule-Associated Protein Kinase** Gilles L'Allemain, Jeng-Horng Her, Jie Wu, Thomas W. Sturgill, and Michael J. Weber 2222-2229
- Altered Chromosome 6 in Immortal Human Fibroblasts** Karen Hubbard-Smith, Philippos Patsalis, Jose R. Pardinas, Krishna K. Jha, Ann S. Henderson, and Harvey L. Ozer 2273-2281
- A Dominant Negative Allele of p34^{cdc2} Shows Altered Phosphoamino Acid Content and Sequesters p56^{cdc13} Cyclin** Ursula N. Fleig, Kathleen L. Gould, and Paul Nurse 2295-2301
- Association between B-Lymphocyte Membrane Immunoglobulin and Multiple Members of the Src Family of Protein Tyrosine Kinases** Mary-Ann Campbell and Bartholomew M. Sefton 2315-2321
- Macrophage Growth Arrest by Cyclic AMP Defines a Distinct Checkpoint in the Mid-G₁ Stage of the Cell Cycle and Overrides Constitutive *c-myc* Expression** Charles O. Rock, John L. Cleveland, and Suzanne Jackowski 2351-2358
- Characterization of Hematopoietic Intracellular Protein Tyrosine Phosphatases: Description of a Phosphatase Containing an SH2 Domain and Another Enriched in Proline-, Glutamic Acid-, Serine-, and Threonine-Rich Sequences** R. James Matthews, David B. Bowne, Edwin Flores, and Matthew L. Thomas 2396-2405
- Differential Regulation of the *Wnt* Gene Family during Pregnancy and Lactation Suggests a Role in Postnatal Development of the Mammary Gland** Brian J. Gavin and Andrew P. McMahon 2418-2423

CELL AND ORGANELLE STRUCTURE AND ASSEMBLY

Hydrolysis of GTP by Sec4 Protein Plays an Important Role in Vesicular Transport and Is Stimulated by a GTPase-Activating Protein in *Saccharomyces cerevisiae*

Nancy C. Walworth, Patrick Brennwald, Alisa K. Kabcenell, Michelle Garrett, and Peter Novick 2017–2028

The Transport of Proteins into the Nucleus Requires the 70-Kilodalton Heat Shock Protein or Its Cytosolic Cognate

Yanggu Shi and John O. Thomas 2186–2192

DNA DYNAMICS AND CHROMOSOME STRUCTURE

A High-Mobility-Group Protein and Its cDNAs from *Drosophila melanogaster*

Cynthia R. Wagner, Koei Hamana, and Sarah C. R. Elgin 1915–1923

Yeast Telomere Repeat Sequence (TRS) Improves Circular Plasmid Segregation, and TRS Plasmid Segregation Involves the *RAP1* Gene Product

Mark S. Longtine, Shinichiro Enomoto, Stacey L. Finstad, and Judith Berman 1997–2009

Mechanisms and Consequences of the Duplication of the Human C4/P450c21/Gene X Locus

Stephen E. Gitelman, James Bristow, and Walter L. Miller 2124–2134

Production of Homozygous Mutant ES Cells with a Single Targeting Construct

Richard M. Mortensen, David A. Conner, Stephen Chao, Anja A. T. Geisterfer-Lowrance, and J. G. Seidman 2391–2395

A Group of scs Elements Function as Domain Boundaries in an Enhancer-Blocking Assay

Rebecca Kellum and Paul Schedl 2424–2431

The *Drosophila* ACE3 Chorion Element Autonomously Induces Amplification

Janet L. Carminati, Cynthia G. Johnston, and Terry L. Orr-Weaver 2444–2453

ERRATUM

Expression of the *DAL80* Gene, Whose Product Is Homologous to the GATA Factors and Is a Negative Regulator of Multiple Nitrogen Catabolic Genes in *Saccharomyces cerevisiae*, Is Sensitive to Nitrogen Catabolite Repression

Thomas S. Cunningham and Terrance G. Cooper 2454
