

MOLECULAR AND CELLULAR BIOLOGY

Volume 14

June 1994

No. 6

GENE EXPRESSION

TFIIIR Is an Isoleucine tRNA	Heather M. Dunstan, Lisa S. Young, and Karen U. Sprague	3588–3595
tRNA^{Ile}_{IAU} (TFIIIR) Plays an Indirect Role in Silkworm Class III Transcription In Vitro and Inhibits Low-Frequency DNA Cleavage	Heather M. Dunstan, Lisa S. Young, and Karen U. Sprague	3596–3603
A Carbon Source-Responsive Promoter Element Necessary for Activation of the Isocitrate Lyase Gene <i>ICLI</i> Is Common to Genes of the Gluconeogenic Pathway in the Yeast <i>Saccharomyces cerevisiae</i>	Anja Schöler and Hans-Joachim Schüller	3613–3622
Commitment of Yeast Pre-mRNA to the Splicing Pathway Requires a Novel U1 Small Nuclear Ribonucleoprotein Polypeptide, Prp39p	Shawn R. Lockhart and Brian C. Rymond	3623–3633
<i>TPD1</i> of <i>Saccharomyces cerevisiae</i> Encodes a Protein Phosphatase 2C-Like Activity Implicated in tRNA Splicing and Cell Separation	M. K. Robinson, W. H. van Zyl, E. M. Phizicky, and J. R. Broach	3634–3645
Preferential Deadenylation of <i>Hsp70</i> mRNA Plays a Key Role in Regulating <i>Hsp70</i> Expression in <i>Drosophila melanogaster</i>	Robert P. Dellavalle, Robert Petersen, and Susan Lindquist	3646–3659
Accurate Polyadenylation of Procyclin mRNAs in <i>Trypanosoma brucei</i> Is Determined by Pyrimidine-Rich Elements in the Intergenic Regions	Nadia Schürch, Adrian Hehl, Erik Vassella, Richard Braun, and Isabel Roditi	3668–3675
Equivalent Mutations in the Two Repeats of Yeast TATA-Binding Protein Confer Distinct TATA Recognition Specificities	Karen M. Arndt, C. Richard Wobbe, Stephanie Ricupero-Hovasse, Kevin Struhl, and Fred Winston	3719–3728
A Novel Developmental Regulatory Motif Required for Stage-Specific Activation of the ϵ-Globin Gene and Nuclear Factor Binding in Embryonic Erythroid Cells	William L. Trepicchio, Michael A. Dyer, and Margaret H. Baron	3763–3771
Vertebrate mRNAs with a 5'-Terminal Pyrimidine Tract Are Candidates for Translational Repression in Quiescent Cells: Characterization of the Translational <i>cis</i>-Regulatory Element	Dror Avni, Silvian Shama, Fabrizio Loreni, and Oded Meyuhas	3822–3833
Erythroid Expression of the Heme-Regulated eIF-2α Kinase	John S. Crosby, Karen Lee, Irving M. London, and Jane-Jane Chen	3906–3914
A Human <i>Alu</i> RNA-Binding Protein Whose Expression Is Associated with Accumulation of Small Cytoplasmic <i>Alu</i> RNA	Dau-Yin Chang, Bergen Nelson, Timothy Bilyeu, Karl Hsu, Gretchen J. Darlington, and Richard J. Maraia	3949–3959
Presence of Negative and Positive <i>cis</i>-Acting RNA Splicing Elements within and Flanking the First <i>tat</i> Coding Exon of Human Immunodeficiency Virus Type 1	Brad A. Amendt, David Hesslein, Lung-Ji Chang, and C. Martin Stoltzfus	3960–3970
Repression of Cyclin D1: a Novel Function of MYC	Angelika Philipp, Andreas Schneider, Imre Väsrik, Kerstin Finke, Yue Xiong, David Beach, Kari Alitalo, and Martin Eilers	4032–4043
Processing of Truncated Mouse or Human rRNA Transcribed from Ribosomal Minigenes Transfected into Mouse Cells	Krassimira V. Hadjiolova, Andrea Normann, Jérôme Cavaillé, Eric Soupène, Sylvie Mazan, Asen A. Hadjiolov, and Jean-Pierre Bachelier	4044–4056

Continued on following page

Continued from preceding page

The Insulin Gene Contains Multiple Transcriptional Elements That Respond to Glucose	Michael S. German and Juehu Wang	4067–4075
An Amino-Terminal Tetrapeptide Specifies Cotranslational Degradation of β-Tubulin but Not α-Tubulin mRNAs	Cindy J. Bachurski, Nicholas G. Theodorakis, Richard M. R. Coulson, and Don W. Cleveland	4076–4086
m₃G Cap Hypermethylation of U1 Small Nuclear Ribonucleoprotein (snRNP) In Vitro: Evidence that the U1 Small Nuclear RNA-(Guanosine-N₂)-Methyltransferase Is a Non-snRNP Cytoplasmic Protein That Requires a Binding Site on the Sm Core Domain	Gabriele Plessel, Utz Fischer, and Reinhard Lührmann	4160–4172
An rRNA Variable Region Has an Evolutionarily Conserved Essential Role despite Sequence Divergence	Rosemary Sweeney, Lihua Chen, and Meng-Chao Yao	4203–4215
The Human Cut Homeodomain Protein Represses Transcription from the <i>c-myc</i> Promoter	Daniel Dufort and Alain Nepveu	4251–4257
Heterokaryons of Cardiac Myocytes and Fibroblasts Reveal the Lack of Dominance of the Cardiac Muscle Phenotype	Sylvia M. Evans, Li-Jung Tai, Valerie P. Tan, Cathy B. Newton, and Kenneth R. Chien	4269–4279
Serum Amyloid A Gene Expression under Acute-Phase Conditions Involves Participation of Inducible C/EBP-β and C/EBP-δ and Their Activation by Phosphorylation	Alpana Ray and Bimal K. Ray	4324–4332
TRANSCRIPTIONAL REGULATION		
Lipopolysaccharide Induction of Tissue Factor Gene Expression in Monocytic Cells Is Mediated by Binding of c-Rel/p65 Heterodimers to a κB-Like Site	Paul A. Oeth, Graham C. N. Parry, Charles Kunsch, Pascale Nantermet, Craig A. Rosen, and Nigel Mackman	3772–3781
The Yeast GAL11 Protein Is Involved in Regulation of the Structure and the Position Effect of Telomeres	Yuriko Suzuki and Masafumi Nishizawa	3791–3799
DNA Recognition by Splicing Variants of the Wilms' Tumor Suppressor, WT1	Iain A. Drummond, Harald D. Rupprecht, Patricia Rohwer-Nutter, Jesus M. Lopez-Guisa, Stephen L. Madden, Frank J. Rauscher III, and Vikas P. Sukhatme	3800–3809
Multiple Mechanisms Provide Rapid and Stringent Glucose Repression of <i>GAL</i> Gene Expression in <i>Saccharomyces cerevisiae</i>	Mark Johnston, Jeffrey S. Flick, and Terry Pexton	3834–3841
Identification of Potential Target Genes for Adr1p through Characterization of Essential Nucleotides in UAS1	Cheng Cheng, Nataly Kacherovsky, Kenneth M. Dombek, Sylvie Camier, Sushil K. Thukral, Edwin Rhim, and Elton T. Young	3842–3852
An E-Box Element Localized in the First Intron Mediates Regulation of the Prothymosin α Gene by <i>c-myc</i>	Stefan Gaubatz, Albrecht Meichle, and Martin Eilers	3853–3862
<i>BCL3</i> Encodes a Nuclear Protein Which Can Alter the Subcellular Location of NF-κB Proteins	Qiang Zhang, Joseph A. Didonato, Michael Karin, and Timothy W. McKeithan	3915–3926
RNA Polymerase II Cofactor PC2 Facilitates Activation of Transcription by GAL4-AH In Vitro	Marcus Kretzschmar, Gertraud Stelzer, Robert G. Roeder, and Michael Meisterernst	3927–3937
Fusion with E2A Converts the Pbx1 Homeodomain Protein into a Constitutive Transcriptional Activator in Human Leukemias Carrying the t(1;19) Translocation	Qiang Lu, Dwaine D. Wright, and Mark P. Kamps	3938–3948

Continued on following page

Continued from preceding page

Constitutive NF-κB Activity in Neurons	Christian Kaltschmidt, Barbara Kaltschmidt, Harald Neumann, Hartmut Wekerle, and Patrick A. Baeuerle	3981–3992
Nucleosomal Location of the <i>STE6</i> TATA Box and Matα2p-Mediated Repression	Hugh-G. Patterton and Robert T. Simpson	4002–4010
The <i>Drosophila</i> Tissue-Specific Factor Grainyhead Contains Novel DNA-Binding and Dimerization Domains Which Are Conserved in the Human Protein CP2	Anne E. Uv, Christopher R. L. Thompson, and Sarah J. Bray	4020–4031
Mapping and Mutagenesis of the Amino-Terminal Transcriptional Repression Domain of the <i>Drosophila</i> Krüppel Protein	Jonathan D. Licht, Wendy Hanna-Rose, Josina C. Reddy, Milton A. English, Marguerite Ro, Martha Gressel, Rita Shaknovich, and Ulla Hansen	4057–4066
Pan/E2A Expression Precedes Immunoglobulin Heavy-Chain Expression during B Lymphopoiesis in Nontransformed Cells, and Pan/E2A Proteins Are Not Detected in Myeloid Cells	Yakop Jacobs, Xue-Qin Xin, Kenneth Dorshkind, and Christian Nelson	4087–4096
Differential Binding of c-Myc and Max to Nucleosomal DNA	Daniel S. Wechsler, Ophelia Papoulas, Chi V. Dang, and Robert E. Kingston	4097–4107
Participation of Ets Transcription Factors in the Glucocorticoid Response of the Rat Tyrosine Aminotransferase Gene	Maria Lluisa Espinás, Jeanne Roux, Jacques Ghysdael, Raymond Pictet, and Thierry Grange	4116–4125
Functional Substitution of an Essential Yeast RNA Polymerase Subunit by a Highly Conserved Mammalian Counterpart	Keith McKune and Nancy A. Woychik	4155–4159
Promoter Activity of the Proliferating-Cell Nuclear Antigen Gene Is Associated with Inducible CRE-Binding Proteins in Interleukin 2-Stimulated T Lymphocytes	Danyang Huang, Pierette M. Shipman-Appasamy, Dana J. Orten, Steven H. Hinrichs, and Michael B. Prystowsky	4233–4243
TATA-Dependent Enhancer Stimulation of Promoter Activity in Mice Is Developmentally Acquired	Sadhan Majumder and Melvin L. DePamphilis	4258–4268
GATA Elements Are Necessary for the Activity and Tissue Specificity of the T-Cell Receptor Beta-Chain Transcriptional Enhancer	A. J. Henderson, S. McDougall, J. Leiden, and K. L. Calame	4286–4294
Mutations That Alter Ligand-Induced Switches and Dimerization Activities in the Retinoid X Receptor	Xiao-kun Zhang, Gilles Salbert, Mi-Ock Lee, and Magnus Pfahl	4311–4323
CELL GROWTH AND DEVELOPMENT		
Activation and Inhibition of Erythropoietin Receptor Function: Role of Receptor Dimerization	Stephanie S. Watowich, Douglas J. Hilton, and Harvey F. Lodish	3535–3549
ErbB3 Is Involved in Activation of Phosphatidylinositol 3-Kinase by Epidermal Growth Factor	Stephen P. Soltoff, Kermit L. Carraway III, S. A. Prigent, W. G. Gullick, and Lewis C. Cantley	3550–3558
dorsal, a <i>Drosophila</i> Rel-Like Protein, Is Phosphorylated upon Activation of the Transmembrane Protein Toll	Susan K. H. Gillespie and Steven A. Wasserman	3559–3568
Role of IRS-1–GRB-2 Complexes in Insulin Signaling	Martin G. Myers, Jr., Ling-Mai Wang, Xiao Jian Sun, Yitao Zhang, Lynne Yenush, Joseph Schlessinger, Jacalyn H. Pierce, and Morris F. White	3577–3587

Continued on following page

Continued from preceding page

Effect of a Null Mutation of the Insulin-Like Growth Factor I Receptor Gene on Growth and Transformation of Mouse Embryo Fibroblasts	Christian Sell, Guillaume Dumenil, Catherine Deveaud, Masahiko Miura, Domenico Coppola, Tiziana DeAngelis, Raphael Rubin, Argiris Efstratiadis, and Renato Baserga	3604–3612
Evidence that v-Src-Induced Phospholipase D Activity Is Mediated by a G Protein	Hong Jiang, Konstantina Alexandropoulos, Jianguo Song, and David A. Foster	3676–3682
A Novel Inhibitor of Cyclin-Cdk Activity Detected in Transforming Growth Factor β-Arrested Epithelial Cells	Joyce M. Slingerland, Ludger Hengst, Chin-Huei Pan, David Alexander, Martha R. Stampfer, and Steven I. Reed	3683–3694
Adenovirus E3 Protein Causes Constitutively Internalized Epidermal Growth Factor Receptors To Accumulate in a Prelysosomal Compartment, Resulting in Enhanced Degradation	Patricia Hoffman and Cathleen Carlin	3695–3706
Two Types of RAS Mutants That Dominantly Interfere with Activators of RAS	Vincent Jung, Wen Wei, Roymarie Ballester, Jacques Camonis, Sha Mi, Linda Van Aelst, Michael Wigler, and Daniel Broek	3707–3718
Interactions of p59^{lⁱⁿ} and ZAP-70 with T-Cell Receptor Activation Motifs: Defining the Nature of a Signalling Motif	Lisa K. Timson Gauen, Yuexin Zhu, François Letourneur, Qile Hu, Joseph B. Bolen, Louis A. Matis, Richard D. Klausner, and Andrey S. Shaw	3729–3741
Protein Phosphatase 2C, Encoded by <i>ptc1</i>⁺, Is Important in the Heat Shock Response of <i>Schizosaccharomyces pombe</i>	Kazuhiro Shiozaki, Haleh Akhavan-Niaki, Clare H. McGowan, and Paul Russell	3742–3751
PRL-1, a Unique Nuclear Protein Tyrosine Phosphatase, Affects Cell Growth	Robert H. Diamond, Drew E. Cressman, Thomas M. Laz, Charles S. Abrams, and Rebecca Taub	3752–3762
The η Isoform of Protein Kinase C Is Localized on Rough Endoplasmic Reticulum	Kazuhiro Chida, Hiroshi Sagara, Yasutoshi Suzuki, Akiko Murakami, Shin-ichi Osada, Shigeo Ohno, Kazushige Hirosawa, and Toshio Kuroki	3782–3790
Type I Receptors Specify Growth-Inhibitory and Transcriptional Responses to Transforming Growth Factor β and Activin	Juan Cárcamo, Frances M. B. Weis, Francesc Ventura, Rotraud Wieser, Jeffrey L. Wrana, Liliana Attisano, and Joan Massagué	3810–3821
Tissue-Specific Expression of the Human CD19 Gene in Transgenic Mice Inhibits Antigen-Independent B-Lymphocyte Development	Liang-Ji Zhou, Heidi M. Smith, Thomas J. Waldschmidt, Roland Schwarting, John Daley, and Thomas F. Tedder	3884–3894
Analysis of the Structural Genes Encoding M-Factor in the Fission Yeast <i>Schizosaccharomyces pombe</i>: Identification of a Third Gene, <i>mfm3</i>	Søren Kjærulff, John Davey, and Olaf Nielsen	3895–3905
Aberrant Function of the Ras-Related Protein TC21/R-Ras2 Triggers Malignant Transformation	Suzanne M. Graham, Adrienne D. Cox, George Drivas, Mark G. Rush, Peter D'Eustachio, and Channing J. Der	4108–4115
<i>GPDI</i>, Which Encodes Glycerol-3-Phosphate Dehydrogenase, Is Essential for Growth under Osmotic Stress in <i>Saccharomyces cerevisiae</i>, and Its Expression Is Regulated by the High-Osmolarity Glycerol Response Pathway	Jacobus Albertyn, Stefan Hohmann, Johan M. Thevelein, and Bernard A. Prior	4135–4144

A Novel Basic Helix-Loop-Helix Protein Is Expressed in Muscle Attachment Sites of the <i>Drosophila</i> Epidermis	Philippe Armand, Anita C. Knapp, Alec J. Hirsch, Eric F. Wieschaus, and Michael D. Cole	4145–4154
Apoptosis in Erythroid Progenitors Deprived of Erythropoietin Occurs during the G₁ and S Phases of the Cell Cycle without Growth Arrest or Stabilization of Wild-Type p53	Linda L. Kelley, Wayne F. Green, Geoffrey G. Hicks, Maurice C. Bondurant, Mark J. Koury, and H. Earl Ruley	4183–4192
Farnesyltransferase Inhibition Causes Morphological Reversion of <i>ras</i>-Transformed Cells by a Complex Mechanism That Involves Regulation of the Actin Cytoskeleton	George C. Prendergast, Joseph P. Davide, S. Jane deSolms, Elizabeth A. Giuliani, Samuel L. Graham, Jackson B. Gibbs, Allen Oliff, and Nancy E. Kohl	4193–4202
Effects of Mutant Ran/TC4 Proteins on Cell Cycle Progression	Mindong Ren, Elias Coutavas, Peter D'Eustachio, and Mark G. Rush	4216–4224
Ubiquitous and Tenacious Methylation of the CpG Site in Codon 248 of the p53 Gene May Explain Its Frequent Appearance as a Mutational Hot Spot in Human Cancer	A. Nozibusiso Magewu and Peter A. Jones	4225–4232
Myogenic Differentiation Triggered by Antisense Acidic Fibroblast Growth Factor RNA	Jonathan C. Fox, Anna Y. Hsu, and Judith L. Swain	4244–4250
The Transforming Growth Factor β Type II Receptor Can Replace the Activin Type II Receptor in Inducing Mesoderm	Anil Bhushan, Herbert Y. Lin, Harvey F. Lodish, and Chris R. Kintner	4280–4285
Cell Transformation by <i>c-fos</i> Requires an Extended Period of Expression and Is Independent of the Cell Cycle	Graham G. Miao and Tom Curran	4295–4310
DNA DYNAMICS AND CHROMOSOME STRUCTURE		
Yeast Nucleotide Excision Repair Proteins Rad2 and Rad4 Interact with RNA Polymerase II Basal Transcription Factor b (TFIIH)	A. Jane Bardwell, Lee Bardwell, Narayan Iyer, Jesper Q. Svejstrup, William J. Feaver, Roger D. Kornberg, and Errol C. Friedberg	3569–3576
Mitochondrial Topoisomerase II Activity Is Essential for Kinetoplast DNA Minicircle Segregation	Theresa A. Shapiro	3660–3667
Fine-Resolution Mapping of Spontaneous and Double-Strand Break-Induced Gene Conversion Tracts in <i>Saccharomyces cerevisiae</i> Reveals Reversible Mitotic Conversion Polarity	Douglas B. Sweetser, Heather Hough, Jennifer F. Whelden, Melissa Arbuckle, and Jac A. Nickoloff	3863–3875
<i>scid</i> Cells Efficiently Integrate Hairpin and Linear DNA Substrates	Jane E. Staunton and David T. Weaver	3876–3883
A Strand Bias Occurs in Point Mutations Associated with Variant Surface Glycoprotein Gene Conversion in <i>Trypanosoma rhodesiense</i>	Ying Lu, Clara M. Alarcon, Ted Hall, Lekkala V. Reddy, and John E. Donelson	3971–3980
Human Replication Protein A Binds Single-Stranded DNA in Two Distinct Complexes	Leonard J. Blackwell and James A. Borowiec	3993–4001
The <i>CRY1</i> Gene in <i>Chlamydomonas reinhardtii</i>: Structure and Use as a Dominant Selectable Marker for Nuclear Transformation	Julie A. E. Nelson, Paul B. Savereide, and Paul A. Lefebvre	4011–4019
Mutational Analysis of ERCC3, Which Is Involved in DNA Repair and Transcription Initiation: Identification of Domains Essential for the DNA Repair Function	Libin Ma, Antonia Westbroek, Aart G. Jochemsen, Geert Weeda, Anne Bosch, Dirk Bootsma, Jan H. J. Hoeijmakers, and Alex J. van der Eb	4126–4134
Homologous Recombination of Monkey α-Satellite Repeats in an In Vitro Simian Virus 40 Replication System: Possible Association of Recombination with DNA Replication	Ichiro Kawasaki, Young Seuk Bae, Toshihiko Eki, Yoshie Kim, and Hideo Ikeda	4173–4182
