

the cold facts about big capacity incubators

10940 DUTTON ROAD, PHILADELPHIA, PA 19154
215-824-1700 or 800-523-3608

MODEL 352600 REFRIGERATOR INCUBATOR

Want dependable, low cost incubation? Our "no frills" Models 352600 and 352601 offer 19 cu ft capacity—at lower cost per foot than competition—without sacrificing quality or performance. Both incubators provide 2 to 50°C ($\pm 0.25^\circ\text{C}$) while Model 352601 also doubles as a -20°C freezer!

These mechanically convected "workhorses" feature high and low safety thermostats, heavy steel cabinets, safety keylocks and 5-year compressor warranties. You see, it doesn't have to be expensive to be a Hotpack!

On the interface of basic and applied science:

MICROBIOLOGY 1981

Editor: David Schlessinger

April 1981, 424 pages, clothbound.

\$15.00 to members of ASM, \$25.00 to others. ISBN: 0-914826-31-X

Price subject to change without notice.

100 extended abstracts of recent conference and symposium reports bring to the scientist some of the most exciting work in the following major areas:

- REGULATORY MECHANISMS
- GENE MOVEMENTS AND LABORATORY EVOLUTION
- INFECTIOUS DISEASES ■ DIAGNOSTIC IMMUNOLOGY
- GENETICS AND MOLECULAR BIOLOGY OF INDUSTRIAL MICROORGANISMS

Napco® promises you:

No other water jacketed CO₂ incubator can match the new 6000 series.

Over 15 advanced features are making incubator history. Here are a few of them.

More accurate control of chamber temperature.

By positioning sensors not only in the water jacket, *but in each separate chamber*, Napco permits more precise chamber monitoring than other water jacketed incubators.

The only water jacketed CO₂ incubator you can get really clean.

Shelf standards and plenums can be easily removed

for cleaning in five minutes. This leaves an empty, perfectly smooth chamber that can be swabbed for easy management of spores and contaminating

organisms.

Unique wet-jet air flow system.

The exclusive wet-jet air flow system provides maximum chamber uniformity and assures the

highest relative humidity available in any incubator.

And the list goes on. Feature after feature are designed for your

convenience and precision performance. Send for the complete brochure.

All Napco water-jacketed

incubators are available in three space-saving models.

Meeting the bacteriologist's need for a compact handbook of laboratory methods—

Manual of Methods for General Bacteriology

EDITOR-IN-CHIEF:
Philipp Gerhardt

SECTION EDITORS:
Ralph N. Costilow
Noel R. Krieg
R. G. E. Murray
Eugene W. Nester
G. Briggs Phillips
Willis A. Wood

Published
and distributed
by:

American Society
for Microbiology
1913 I Street, NW
Washington, DC 20006

This *Manual* covers all the taxa of bacteria, and its approach is generalized for both pure and applied bacteriology. Aimed at senior undergraduate and beginning graduate science majors, at teachers and researchers, the *Manual* provides practical descriptions of laboratory procedures that are known to be reliable and that are in frequent use. It is an invaluable tool for all involved in bacteriology in the laboratory setting.

The book comprises six sections, each of which is self-contained, with its own table of contents to help the reader find specific methods as easily as possible. The contents are listed below.

METHODOLOGY FOR GENERAL BACTERIOLOGY

MORPHOLOGY—Light Microscopy—Specimen Preparation for Light Microscopy—Determinative Methods of Light Microscopy—Electron Microscopy—Cell Fractionation

GROWTH—Biophysical Factors in Growth—Biochemical Factors in Growth—Enrichment and Isolation—Solid Culture—Liquid Culture—Growth Measurement—Preservation

GENETICS—Gene Mutation—Gene Transfer—Plasmids

METABOLISM—Physical Methods—Chemical Composition—Enzymatic Activity—Permeability and Transport

SYSTEMATICS—General Characterization—Numerical Taxonomy—Genetic Characterization

LABORATORY SAFETY—Sterilization—Containment and Disinfection

ADDENDUM—Diluents and Biomass Measurement

Publication of

Current Chemotherapy and Immunotherapy

EDITORS: Piero Periti and Giuliana Gialdroni Grassi
PUBLISHER: American Society for Microbiology

Proceedings of the 12th International Congress of Chemotherapy

CURRENT CHEMOTHERAPY AND IMMUNOTHERAPY marks the outcome of the 12th ICC, a scientific meeting which is characterized by the excitement of new ideas and the presence of leading scientists from around the world. The two-volume book is remarkable, not only because it captures so vividly, by using extended abstracts, the essential content of the scientific information exchanged in Florence, but also because of the rapidity with which the material has been made available to scientists not fortunate enough to attend the meeting.

This compendium of information covers antimicrobial, anticancer, and antiviral chemotherapy, as well as immunology

and immunotherapy. Papers are divided into the following sections:

- Antimicrobial Agents
- Antiviral Agents
- Interferon
- Immunology
- Anticancer Chemotherapy

The two-volume set of meticulously edited, fully indexed books should be in every library with collections in chemotherapy, pharmacology, pharmaceutical sciences, cancer research, immunology, immunotherapy, antimicrobial agents, and medical microbiology. In addition, individual scientists whose work requires up-to-date knowledge of recent developments in current chemotherapy and immunotherapy will find this publication invaluable.

ORDERING INFORMATION

June 1982. Approximately 1,800 pages, in two clothbound volumes, sold only as a set. ISBN: 0-914826-39-5. \$90.00 (\$50.00 to members of the American Society for Microbiology, who must remit with order.) Please note that all orders from outside the United States must be prepaid in US dollars.

State-of-the-art technology in clinical microbiology

RAPID METHODS and AUTOMATION in Microbiology

EDITOR: Richard C. Tilton

This new collection of research papers on a topic of increasing and critical interest promises to be of real assistance to clinical microbiologists, clinical pathologists, immunologists, medical technologists, and others who are caught up in the rapidly changing environment of microbiology. The speed of publication lends added utility to this survey of technologically advanced—and advancing—methods and procedures. The book, indeed, captures some of the excitement that was in the air at the meeting in May 1981 on which this volume is based: the Third International Symposium on Rapid Methods and Automation in Microbiology.

As the keynote seminar of the symposium suggested, topics of particular concern include systems approaches, evaluation, and the future of diagnostic systems in microbiology. The book fully develops the following areas:

- Computer Systems in Clinical Microbiology
- Rapid Detection of Microorganisms in Body Fluids
- Hydrophobic Grid-Membrane Microbiology
- Rapid Reporting in Microbiology
- Immunological Diagnosis of Infectious Diseases
- Chromatographic Analysis: a New Future for Clinical Microbiology
- Rapid Detection of Microorganisms in Urine
- Rapid Methods in Food Microbiology
- Systems Approaches to Diagnostic Microbiology
- Rapid Identification of Viral, Chlamydial, and Mycoplasmal Agents
- Rapid Identification of Clinically Important Anaerobes
- Applications of the Autobac System
- Clinical and Research Applications of the MS-2 System
- Nonautomated Rapid Methods in Microbiology

ORDERING INFORMATION:

June 1982. 361 pages. Clothbound. \$30.00. ISBN 0-914826-38-7

Peak quality in chromatography!

New Modular
C-Columns
Now Available

Pharmacia Columns are designed to exploit to the full the separation properties of your bed material.

- High resolution
- Ease of performance and maintenance
- Inertness
- Aqueous or solvent work
- Low or medium pressure
- Fast and easy sample application
- Reversed flow and recycling
- Compatible with a wide range of accessories for systems building
- Reliability

The quality of your work deserves the quality of Pharmacia Columns.

Ask for our free Catalogue and choose from the wide range of Pharmacia Columns. There is one to suit your application.
