Distinct Protein Arginine Methyltransferases Promote ATP-Dependent Chromatin Remodeling Function at Different Stages of Skeletal Muscle Differentiation

Caroline S. Dacwag, Mark T. Bedford, Saïd Sif, and Anthony N. Imbalzano

Department of Cell Biology, University of Massachusetts Medical School, Worcester, Massachusetts, USA; Department of Carcinogenesis, University of Texas M. D. Anderson Cancer Center, Smithville, Texas, USA; Department of Molecular and Cellular Biochemistry, The Ohio State University College of Medicine, Columbus, Ohio, USA

Volume 29, no. 7, p. 1909–1921, 2009. Page 1914, Fig. 4A: The Carm1 Western blot image that was presented for MyoD-differentiated cells was an inadvertent duplication of the Carm1 image for the mock-differentiated cells. The corrected image appears below. This change does not affect any of the results or conclusions of our study.
