

## TABLE OF CONTENTS

### SPOTLIGHT

Articles of Significant Interest Selected from This Issue by the Editors	1899
--	------

### MINIREVIEW

Regulation of KAT6 Acetyltransferases and Their Roles in Cell Cycle Progression, Stem Cell Maintenance, and Human Disease	Fu Huang, Susan M. Abmayr, Jerry L. Workman	1900–1907
---	---	-----------

### ARTICLES

Early Loss of Telomerase Action in Yeast Creates a Dependence on the DNA Damage Response Adaptor Proteins	Kyle A. Jay, Dana L. Smith, Elizabeth H. Blackburn	1908–1919
A Hypertension-Associated tRNA <sup>Ala</sup> Mutation Alters tRNA Metabolism and Mitochondrial Function	Pingping Jiang, Meng Wang, Ling Xue, Yun Xiao, Jialing Yu, Hui Wang, Juan Yao, Hao Liu, Yanyan Peng, Hanqing Liu, Haiying Li, Ye Chen, Min-Xin Guan	1920–1930
AMPK Facilitates Nuclear Accumulation of Nrf2 by Phosphorylating at Serine 550	Min Sung Joo, Won Dong Kim, Ki Young Lee, Ji Hyun Kim, Ja Hyun Koo, Sang Geon Kim	1931–1942
Evidence for Multiple Mediator Complexes in Yeast Independently Recruited by Activated Heat Shock Factor	Jayamani Anandhakumar, Yara W. Moustafa, Surabhi Chowdhary, Amoldeep S. Kainth, David S. Gross	1943–1960
AMPK Phosphorylates Desnutrin/ATGL and Hormone-Sensitive Lipase To Regulate Lipolysis and Fatty Acid Oxidation within Adipose Tissue	Sun-Joong Kim, Tianyi Tang, Marcia Abbott, Jose A. Viscarra, Yuhui Wang, Hei Sook Sul	1961–1976
Novel MicroRNA Regulators of Atrial Natriuretic Peptide Production	Connie Wu, Pankaj Arora, Obiajulu Agha, Liam A. Hurst, Kaitlin Allen, Daniel I. Nathan, Dongjian Hu, Pawina Jiramongkolchai, J. Gustav Smith, Olle Melander, Sander Trenson, Stefan P. Janssens, Ibrahim Domian, Thomas J. Wang, Kenneth D. Bloch, Emmanuel S. Buys, Donald B. Bloch, Christopher Newton-Cheh	1977–1987

*Cover photograph* (Copyright © 2016. American Society for Microbiology. All rights reserved.) Yeast cells expressing an mCherry-tagged Med16 tail subunit of the RNA polymerase II Mediator complex. The image is part of a genetic and molecular analysis which suggests the existence of multiple Mediator complexes in this organism. (See related article on p. 1943.)
