

MOLECULAR AND CELLULAR BIOLOGY

Volume 6

November 1986

No. 11

Null Mutations in the <i>SNF3</i> Gene of <i>Saccharomyces cerevisiae</i> Cause a Different Phenotype than Do Previously Isolated Missense Mutations. Lenore Neigeborn, Pamela Schwartzberg, Robert Reid, and Marian Carlson	3569–3574
<i>Saccharomyces cerevisiae</i> <i>SPT3</i> Gene Is Required for Transposition and Transpositional Recombination of Chromosomal Ty Elements. Jef D. Boeke, Cora A. Styles, and Gerald R. Fink	3575–3581
Nonmuscle and Muscle Tropomyosin Isoforms Are Expressed from a Single Gene by Alternative RNA Splicing and Polyadenylation. David M. Helfman, Steve Cheley, Esa Kuismanen, Linda A. Finn, and Yuriko Yamawaki-Kataoka	3582–3595
Activation of the Adenovirus and BK Virus Late Promoters: Effects of the BK Virus Enhancer and <i>trans</i>-Acting Viral Early Proteins. Brian W. Grinnell, David T. Berg, and Jenna Walls	3596–3605
Gene-Sized Macronuclear DNA Molecules Are Clustered in Micronuclear Chromosomes of the Ciliate <i>Oxytricha nova</i>. L. A. Klobutcher, A. M. Vailonis-Walsh, K. Cahill, and R. M. Ribas-Aparicio	3606–3613
Coding Sequence and Growth Regulation of the Human Vimentin Gene. Sergio Ferrari, Renata Battini, Leszek Kaczmarek, Susan Rittling, Bruno Calabretta, J. Kim de Riel, Vincent Philiponis, Jing-Fang Wei, and Renato Baserga	3614–3620
<i>Saccharomyces cerevisiae</i> Centromere <i>CEN11</i> Does Not Induce Chromosome Instability When Integrated into the <i>Aspergillus nidulans</i> Genome. Margaret T. Boylan, Michael J. Holland, and William E. Timberlake	3621–3625
Comparison of the <i>trans</i>-Activation Capabilities of the Human T-Cell Leukemia Virus Type I and II χ Proteins. Neil P. Shah, William Wachsman, Alan J. Cann, Larry Souza, Dennis J. Slamon, and Irvin S. Y. Chen	3626–3631
Human Homologs of TU Transposon Sequences: Polypurine/Polypyrimidine Sequence Elements That Can Alter DNA Conformation In Vitro and In Vivo. Barbara Hoffman-Liebermann, Dan Liebermann, Anthony Troutt, Laurence H. Kedes, and Stanley N. Cohen	3632–3642
Molecular Analysis of <i>SNF2</i> and <i>SNF5</i>, Genes Required for Expression of Glucose-Repressible Genes in <i>Saccharomyces cerevisiae</i>. Ezra Abrams, Lenore Neigeborn, and Marian Carlson	3643–3651
Transcriptional Control Signals of a Herpes Simplex Virus Type 1 Late (γ_2) Gene Lie within Bases -34 to $+124$ Relative to the 5' Terminus of the mRNA. Fred L. Homa, Thomas M. Otal, Joseph C. Glorioso, and Myron Levine	3652–3666
Minimal Transcriptional Enhancer of Simian Virus 40 Is a 74-Base-Pair Sequence That Has Interacting Domains. Thomas A. Firak and Kiranur N. Subramanian	3667–3676
Structure of the Protein Encoded by the Chicken Proto-Oncogene <i>c-myb</i>. S. Gerondakis and J. M. Bishop	3677–3684
Mitotic Gene Conversion Lengths, Coconversion Patterns, and the Incidence of Reciprocal Recombination in a <i>Saccharomyces cerevisiae</i> Plasmid System. Byung-Yoon Ahn and Dennis M. Livingston	3685–3693

Continued on following page

Product of <i>Saccharomyces cerevisiae</i> Nuclear Gene <i>PET494</i> Activates Translation of a Specific Mitochondrial mRNA. Maria C. Costanzo and Thomas D. Fox	3694–3703
Crystallin Gene Expression and Lentoid Body Formation in Quail Embryo Neuroretina Cultures Transformed by the Oncogenic Retrovirus Mill Hill 2 or Rous Sarcoma Virus. Lionel Simonneau, Patricia Crisanti, Anne Marie Lorinet, Françoise Alliot, Yves Courtois, Georges Calothy, and Bernard Pessac	3704–3710
Two Functional α-Tubulin Genes of the Yeast <i>Saccharomyces cerevisiae</i> Encode Divergent Proteins. Peter J. Schatz, Lorraine Pillus, Paula Grisafi, Frank Solomon, and David Botstein	3711–3721
Genetically Essential and Nonessential α-Tubulin Genes Specify Functionally Interchangeable Proteins. Peter J. Schatz, Frank Solomon, and David Botstein	3722–3733
Variants of Vaccinia Virus Hemagglutinin Altered in Intracellular Transport. Hisatoshi Shida	3734–3745
Characterization of Two Nonallelic Pairs of Late Histone H2A and H2B Genes of the Sea Urchin: Differential Regulation in the Embryo and Tissue-Specific Expression in the Adult. Iris Kemler and Meinrad Busslinger	3746–3754
Characterization of Myelin Proteolipid mRNAs in Normal and Jimpy Mice. Minnetta V. Gardinier, Wendy B. Macklin, A. Jennifer Diniak, and Prescott L. Deininger	3755–3762
Regulation of Adenovirus Gene Expression in Human WI38 Cells by an E1B-Encoded Tumor Antigen. Eileen White, Barbara Faha, and Bruce Stillman	3763–3773
Glycolytic Gene Expression in <i>Saccharomyces cerevisiae</i>: Nucleotide Sequence of <i>GCR1</i>, Null Mutants, and Evidence for Expression. Henry V. Baker	3774–3784
Chromosome-Mediated Gene Transfer of Multidrug Resistance. Philippe Gros, Dorothy A. Fallows, James M. Croop, and David E. Housman	3785–3790
Cellular Promoters Incorporated into the Adenovirus Genome: Cell Specificity of Albumin and Immunoglobulin Expression. J. M. Friedman, L. E. Babiss, D. F. Clayton, and J. E. Darnell, Jr.	3791–3797
Cellular Promoters Incorporated into the Adenovirus Genome: Effects of Viral Regulatory Elements on Transcription Rates and Cell Specificity of Albumin and β-Globin Promoters. L. E. Babiss, J. M. Friedman, and J. E. Darnell, Jr.	3798–3806
Mouse Apolipoprotein A-IV Gene: Nucleotide Sequence and Induction by a High-Lipid Diet. Simon C. Williams, Sally M. Bruckheimer, Aldons J. Lusic, Renee C. LeBoeuf, and Alan J. Kinniburgh	3807–3814
Initiation of Simian Virus 40 DNA Replication In Vitro: Aphidicolin Causes Accumulation of Early-Replicating Intermediates and Allows Determination of the Initial Direction of DNA Synthesis. R. Scott Decker, Masamitsu Yamaguchi, Roberta Possenti, and Melvin L. DePamphilis	3815–3825
Microdissection of and Microcloning from the Short Arm of Human Chromosome 2. Gillian P. Bates, Brandon J. Wainwright, Robert Williamson, and Stephen D. M. Brown	3826–3830
Mating Type-Like Conversion Promoted by the 2μm Circle Site-Specific Recombinase: Implications for the Double-Strand-Gap Repair Model. Makkuni Jayaram	3831–3837

trans Activation of an Epstein-Barr Viral Transcriptional Enhancer by the Epstein-Barr Viral Nuclear Antigen 1. David Reisman and Bill Sugden . . .	3838–3846
Constitutive and Inducible <i>Saccharomyces cerevisiae</i> Promoters: Evidence for Two Distinct Molecular Mechanisms. Kevin Struhl	3847–3853
Characterization of a <i>Tetrahymena thermophila</i> Mutant Strain Unable To Develop Normal Thermotolerance. Kevin W. Kraus, Elizabeth M. Hallberg, and Richard Hallberg	3854–3861
Identification of a Nonhistone Chromosomal Protein Associated with Heterochromatin in <i>Drosophila melanogaster</i> and Its Gene. Tharappel C. James and Sarah C. R. Elgin	3862–3872
Differential Expression of Mouse β/Goat β^c, Mouse β/Goat β^F, and Mouse β/Goat ϵ^{II} Hybrid Globin Genes in Murine Erythroleukemia Cells. Carol B. Kerlakian, Susan W. Toth, Eileen D. Kuempel, and Donal S. Luse	3873–3883
Rat Brain Na,K-ATPase β-Chain Gene: Primary Structure, Tissue-Specific Expression, and Amplification in Ouabain-Resistant HeLa C⁺ Cells. Robert W. Mercer, Jay W. Schneider, Adam Savitz, Janet Emanuel, Edward J. Benz, Jr., and Robert Levenson	3884–3890
Structural and Functional Analysis of the <i>MALI</i> Locus of <i>Saccharomyces cerevisiae</i>. Maureen J. Charron, Robert A. Dubin, and Corinne A. Michels	3891–3899
Expression of a Molecularly Cloned Human <i>c-src</i> Oncogene by Using a Replication-Competent Retroviral Vector. Akio Tanaka and Donald J. Fujita	3900–3909
Structural and Functional Analysis of Chicken U4 Small Nuclear RNA Genes. Michael L. Hoffman, Gina M. Korf, Kathleen J. McNamara, and William E. Stumph	3910–3919
New Class of Polyomavirus Mutant That Can Persist as Free Copies in F9 Embryonal Carcinoma Cells. Kiyoshi Ariizumi and Hiroyoshi Ariga	3920–3927
Participation of the Upstream Region of the Fibroin Gene in the Formation of Transcription Complex In Vitro. Masaaki Tsuda, Susumu Hirose, and Yoshiaki Suzuki	3928–3933
The Evolutionarily Conserved Repetitive Sequence d(TG · AC)_n Promotes Reciprocal Exchange and Generates Unusual Recombinant Tetrads During Yeast Meiosis. Douglas Treco and Norman Arnheim	3934–3947
Effects of Poly[d(pGpT) · d(pApC)] and Poly[d(pCpG) · d(pCpG)] Repeats on Homologous Recombination in Somatic Cells. Peter Bullock, Josh Miller, and Michael Botchan	3948–3953
Induction and Repression of the Urea Amidolyase Gene in <i>Saccharomyces cerevisiae</i>. Francis S. Genbauffe and Terrance G. Cooper	3954–3964
Circumsporozoite Protein of <i>Plasmodium berghei</i>: Gene Cloning and Identification of the Immunodominant Epitopes. Daniel J. Eichinger, David E. Arnot, James P. Tam, Victor Nussenzweig, and Vincenzo Enea	3965–3972
Developmental Regulation of <i>Dictyostelium discoideum</i> Actin Gene Fusions Carried on Low-Copy and High-Copy Transformation Vectors. David A. Knecht, Stephen M. Cohen, William F. Loomis, and Harvey F. Lodish	3973–3983
RNA Polymerase II Interacts with the Promoter Region of the Noninduced <i>hsp70</i> Gene in <i>Drosophila melanogaster</i> Cells. David S. Gilmour and John T. Lis	3984–3989
Multiple <i>GCD</i> Genes Required for Repression of <i>GCN4</i>, a Transcriptional Activator of Amino Acid Biosynthetic Genes in <i>Saccharomyces cerevisiae</i>. Satoshi Harashima and Alan G. Hinnebusch	3990–3998
Varied Interactions between Proviruses and Adjacent Host Chromatin. Kathleen F. Conklin and Mark Groudine	3999–4007

Tripartite Sequences within and 3' to the Sea Urchin H2A Histone Gene Display Properties Associated with a Transcriptional Termination Process. Mike R. Johnson, Chris Norman, Mike A. Reeve, Jaqueline Scully, and Nick J. Proudfoot	4008–4018
Adenovirus E1a Proteins Repress Expression from Polyomavirus Early and Late Promoters. Anna Velcich, Francis G. Kern, Claudio Basilio, and Edward B. Ziff	4019–4025
Constitutive RNA Synthesis for the Yeast Activator <i>ADR1</i> and Identification of the <i>ADR1-5^c</i> Mutation: Implications in Posttranslational Control of <i>ADR1</i>. Clyde L. Denis and Chris Gallo	4026–4030
Accessibility of the Promoter Sequence in the J-Chain Gene Is Regulated by Chromatin Changes During B-Cell Differentiation. Mark E. Minie and Marian Elliott Koshland	4031–4038
Multidrug Resistance of DNA-Mediated Transformants Is Linked to Transfer of the Human <i>mdr1</i> Gene. Ding-wu Shen, Antonio Fojo, Igor B. Roninson, Janice E. Chin, Rena Soffir, Ira Pastan, and Michael M. Gottesman	4039–4045
Effects of Null Mutations in the Hexokinase Genes of <i>Saccharomyces cerevisiae</i> on Catabolite Repression. Hong Ma and David Botstein	4046–4052
A Nuclear Gene of <i>Saccharomyces cerevisiae</i> Needed for Stable Maintenance of Plasmids. Yoshiko Kikuchi and Akio Toh-E	4053–4059
Purification from a Human Hepatoma Cell Line of a Basic Fibroblast Growth Factor-Like Molecule That Stimulates Capillary Endothelial Cell Plasminogen Activator Production, DNA Synthesis, and Migration. Marco Presta, David Moscatelli, Jacquelyn Joseph-Silverstein, and Daniel B. Rifkin	4060–4066
Different Tissue-Specific Expression of the Amylase Gene <i>Amy-1</i> in Mice and Rats. Felipe Sierra, Anne-Cecile Pittet, and Ueli Schibler	4067–4076
T-Antigen-DNA Polymerase α Complex Implicated in Simian Virus 40 DNA Replication. Stephen T. Smale and Robert Tjian	4077–4087
Deregulation of the <i>c-myc</i> Oncogene in Virus-Induced Thymic Lymphomas of AKR/J Mice. Alise Reicin, Jian-qing Yang, Kenneth B. Marcu, Erwin Fleissner, Charles F. Koehne, and Paul V. O'Donnell	4088–4092
Sequences Involved in Accurate and Efficient Transcription of Human <i>c-myc</i> Genes Microinjected into Frog Oocytes. Kazuko Nishikura	4093–4098
Sequence Analysis of Temperature-Sensitive Mutations in the <i>Saccharomyces cerevisiae</i> Gene <i>CDC28</i>. Attila T. Lőrincz and Steven I. Reed	4099–4103
Specific Activation of the Cellular Harvey-<i>ras</i> Oncogene in Dimethylbenzanthracene-Induced Mouse Mammary Tumors. Satya Dandekar, Saraswati Sukumar, Helmut Zarbl, Lawrence J. T. Young, and Robert D. Cardiff ...	4104–4108
Accumulation of <i>c-src</i> mRNA Is Developmentally Regulated in Embryonic Neural Retina. Lily Vardimon, Lyle E. Fox, and A. A. Moscona	4109–4111
Transcriptional and Posttranscriptional Control of <i>c-myc</i> Gene Expression in WEHI 231 Cells. Roy A. Levine, James E. McCormack, Alan Buckler, and Gail E. Sonenshein	4112–4116
The Mouse Immunoglobulin Heavy-Chain Gene Enhancer Contains Sequences That Inhibit Transcription In Vitro in HeLa Cell Extracts. Joseph P. Dougherty, Patrick Augereau, and Pierre Chambon	4117–4121
Active X Chromosome DNA Is Unmethylated at Eight CCGG Sites Clustered in a Guanine-plus-Cytosine-Rich Island at the 5' End of the Gene for Phosphoglycerate Kinase. Douglas H. Keith, Judith Singer-Sam, and Arthur D. Riggs	4122–4125

Chromatin Structure of a P-Element-Transduced <i>hsp-28</i> Gene in <i>Drosophila melanogaster</i>. Joel C. Eissenberg and Sarah C. R. Elgin	4126-4129
In Vivo Competition of δ-Crystallin Gene Expression by DNA Fragments Containing a GC Box. Shigeo Hayashi and Hisato Kondoh	4130-4132
Abelson Virus Abrogation of Interleukin-3 Dependence in a Lymphoid Cell Line. Bernard Mathey-Prevot, Gary Nabel, Ronald Palacios, and David Baltimore	4133-4135
Extensive Mutagenesis of the Nuclear Location Signal of Simian Virus 40 Large-T Antigen. W. H. Colledge, W. D. Richardson, M. D. Edge, and Alan E. Smith	4136-4139
Dissociated Expression of <i>c-myc</i> and a <i>fos</i>-Related Competence Gene During Cardiac Myogenesis. Michael D. Schneider, Paul A. Payne, Hikaru Ueno, M. Benjamin Perryman, and Robert Roberts	4140-4143

Date of Issue: 29 October 1986

NOTICE

Effective with the September 1986 issue, the page charges for *Molecular and Cellular Biology* will be raised to \$55 per page for the first seven pages of any article and \$75 per page for all pages in excess of seven. This increase is required as a small contribution to our increased costs owing to the increasingly heavy flow of submissions and the extraordinary growth this journal is experiencing, far outstripping our planned allocation of pages.

CHANGE IN METHOD OF DELIVERY FOR SUBSCRIPTIONS OUTSIDE THE UNITED STATES

For the past several years, ASM journal subscriptions have been fulfilled via air drop shipment to central distribution points, from which the issues were then mailed. Unfortunately, we can no longer afford this service. To hold down drastically rising costs, we have arranged to distribute our journals through surface drop shipment followed by mailing. Subscribers outside the United States will receive their issues two to three weeks later than heretofore, for which we are deeply regretful. There was no way that we could continue the previous service at its very expensive and continually increasing cost.

This change in mode of delivery will be effective beginning with the November issues. Subscribers within the United States and subscribers from abroad who are paying the surcharge for direct air mail shipment will be unaffected by the change.
