

MOLECULAR AND CELLULAR BIOLOGY

Volume 6

September 1986

No. 9

Genomic Hypomethylation and Far-5' Sequence Alterations Are Associated with Carcinogen-Induced Activation of the Hamster Thymidine Kinase Gene. Frederic G. Barr, Sridharan Rajagopalan, Craig A. MacArthur, and Michael W. Lieberman	3023-3033
Transcriptional Control of Glucoamylase Synthesis in Vegetatively Growing and Sporulating <i>Saccharomyces</i> Species. Isak S. Pretorius, Daniela Modena, Marco Vanoni, Sasha Englard, and Julius Marmur	3034-3041
Promoter Region of Interleukin-2 Gene Undergoes Chromatin Structure Changes and Confers Inducibility on Chloramphenicol Acetyltransferase Gene during Activation of T Cells. Ulrich Siebenlist, David B. Durand, Peter Bressler, Nikki J. Holbrook, Carol A. Norris, Malek Kamoun, Jeffrey A. Kant, and Gerald R. Crabtree	3042-3049
<i>Escherichia coli</i> Aspartate Transcarbamylase: a Novel Marker for Studies of Gene Amplification and Expression in Mammalian Cells. Joseph C. Ruiz and Geoffrey M. Wahl	3050-3058
Introduction of UAG, UAA, and UGA Nonsense Mutations at a Specific Site in the <i>Escherichia coli</i> Chloramphenicol Acetyltransferase Gene: Use in Measurement of Amber, Ochre, and Opal Suppression in Mammalian Cells. John P. Capone, John M. Sedivy, Phillip A. Sharp, and Uttam L. RajBhandary	3059-3067
Induction of Specific Transcription by RNA Polymerase III in Transformed Cells. Michael F. Carey, Karambir Singh, Michael Botchan, and Nicholas R. Cozzarelli	3068-3076
Evolutionarily Selected Replication Origins: Functional Aspects and Structural Organization. Guey-Jen Lee-Chen and Mary Woodworth-Gutai	3077-3085
Simian Virus 40 DNA Replication: Functional Organization of Regulatory Elements. Guey-Jen Lee-Chen and Mary Woodworth-Gutai	3086-3093
Sequence of the Notch Locus of <i>Drosophila melanogaster</i>: Relationship of the Encoded Protein to Mammalian Clotting and Growth Factors. Simon Kidd, Mark R. Kelley, and Michael W. Young	3094-3108
Characterization of an Activated Human <i>ros</i> Gene. Carmen Birchmeier, Daniel Birnbaum, Gayle Waitches, Ottavio Fasano, and Michael Wigler	3109-3116
Rapid Enrichment of HeLa Transcription Factors IIIB and IIIC by Using Affinity Chromatography Based on Avidin-Biotin Interactions. Mary S. Kasher, David Pintel, and David C. Ward	3117-3127
<i>c-erbB</i> Activation in Avian Leukosis Virus-Induced Erythroblastosis: Multiple Epidermal Growth Factor Receptor mRNAs Are Generated by Alternative RNA Processing. Raymond G. Goodwin, Fritz M. Rottman, Thomas Callaghan, Hsing-Jien Kung, Patricia A. Maroney, and Timothy W. Nilsen	3128-3133
Efficient Transcription of a <i>Caenorhabditis elegans</i> Heat Shock Gene Pair in Mouse Fibroblasts Is Dependent on Multiple Promoter Elements Which Can Function Bidirectionally. Robert J. Kay, Robert J. Boissy, Roland H. Russnak, and E. Peter M. Candido	3134-3143

Continued on following page

Transfection of the EJ <i>ras</i>^{Ha} Gene into Keratinocytes Derived from Carcinogen-Induced Mouse Papillomas Causes Malignant Progression. John R. Harper, Dennis R. Roop, and Stuart H. Yuspa	3144–3149
Negative Regulatory Gene for General Control of Amino Acid Biosynthesis in <i>Saccharomyces cerevisiae</i>. Paul Louis Myers, Rachel C. Skvirsky, Miriam L. Greenberg, and Helen Greer	3150–3155
Structure, Organization, and Sequence of Alpha Satellite DNA from Human Chromosome 17: Evidence for Evolution by Unequal Crossing-Over and an Ancestral Pentamer Repeat Shared with the Human X Chromosome. John S. Wayne and Huntington F. Willard	3156–3165
Construction and Behavior of Circularly Permuted and Telocentric Chromosomes in <i>Saccharomyces cerevisiae</i>. Andrew W. Murray and Jack W. Szostak	3166–3172
Human Growth Hormone as a Reporter Gene in Regulation Studies Employing Transient Gene Expression. Richard F. Selden, Kathleen Burke Howie, Mary Ellen Rowe, Howard M. Goodman, and David D. Moore	3173–3179
Binding of Polyomavirus Large T Antigen to the Human <i>hsp70</i> Promoter Is Not Required for <i>trans</i> Activation. Robert E. Kingston, Alison Cowie, Richard I. Morimoto, and Katrina A. Gwinn	3180–3190
Anchoring a Secreted Plasmodium Antigen on the Surface of Recombinant Vaccinia Virus-Infected Cells Increases Its Immunogenicity. Christopher J. Langford, Stirling J. Edwards, Geoffrey L. Smith, Graham F. Mitchell, Bernard Moss, David J. Kemp, and Robin F. Anders	3191–3199
A Consensus Sequence Polymer Inhibits In Vivo Expression of Heat Shock Genes. Hua Xiao and John T. Lis	3200–3206
Rearrangement and Expression of T-Cell Antigen Receptor Genes in Human T-Lymphocyte Tumor Lines and Normal Human T-Cell Clones: Evidence for Allelic Exclusion of <i>Tiβ</i> Gene Expression and Preferential Use of a <i>Jβ2</i> Gene Segment. Jeffrey M. Leiden, Deno P. Dialynas, Allan D. Duby, Cornelius Murre, Jon Seidman, and Jack L. Strominger	3207–3214
Organization of Regionally Expressed Silkmoth Chorion Genes. Antonis K. Hatzopoulos and Jerome C. Regier	3215–3220
Synergism of <i>v-myc</i> and <i>v-Ha-ras</i> in the In Vitro Neoplastic Progression of Murine Lymphoid Cells. Richard C. Schwartz, Lawrence W. Stanton, Sylvia C. Riley, Kenneth B. Marcu, and Owen N. Witte	3221–3231
Immunologically Distinct p53 Molecules Generated by Alternative Splicing. Naoko Arai, Doug Nomura, Kyoko Yokota, David Wolf, Einat Brill, Orit Shohat, and Varda Rotter	3232–3239
Structure and Expression of Two Temperature-Specific Surface Proteins in the Ciliated Protozoan <i>Tetrahymena thermophila</i>. Gary A. Bannon, Rhonda Perkins-Dameron, and Averie Allen-Nash	3240–3245
Recombination of Homologous DNA Fragments Transfected into Mammalian Cells Occurs Predominantly by Terminal Pairing. Richard A. Anderson and Steven L. Eliason	3246–3252
Precise Assignment of the Light-Strand Promoter of Mouse Mitochondrial DNA: a Functional Promoter Consists of Multiple Upstream Domains. David D. Chang and David A. Clayton	3253–3261
Precise Assignment of the Heavy-Strand Promoter of Mouse Mitochondrial DNA: Cognate Start Sites Are Not Required for Transcriptional Initiation. David D. Chang and David A. Clayton	3262–3267

Characterization of a Family of Gamma-Ray-Induced CHO Mutants Demonstrates that the <i>IdlA</i> Locus Is Diploid and Encodes the Low-Density Lipoprotein Receptor. Robert D. Sege, Karen F. Kozarsky, and Monty Krieger	3268-3277
Point Mutation Associated with Hereditary Persistence of Fetal Hemoglobin Decreases RNA Polymerase III Transcription Upstream of the Affected γ-Globin Gene. David P. Carlson and Jeffrey Ross	3278-3282
Expression of Multiple Proliferin Genes in Mouse Cells. Elizabeth L. Wilder and Daniel I. H. Linzer	3283-3286
Regulation of a Human Cardiac Actin Gene Introduced into Rat L6 Myoblasts Suggests a Defect in Their Myogenic Program. Robert Hickey, Arthur Skoultchi, Peter Gunning, and Larry Kedes	3287-3290
<i>ras</i>^H Mutants Deficient in GTP Binding. Channing J. Der, Bin-Tao Pan, and Geoffrey M. Cooper	3291-3294
High-Efficiency Transformation of <i>Saccharomyces cerevisiae</i> Cells by Bacterial Minicell Protoplast Fusion. J. Gyuris and E. G. Duda	3295-3297

Date of Issue: 29 August 1986

NOTICE

Effective with the September 1986 issue, the page charges for *Molecular and Cellular Biology* will be raised to \$55 per page for the first seven pages of any article and \$75 per page for all pages in excess of seven. This increase is required as a small contribution to our increased costs owing to the increasingly heavy flow of submissions and the extraordinary growth this journal is experiencing, far outstripping our planned allocation of pages.

CHANGE IN METHOD OF DELIVERY FOR SUBSCRIPTIONS OUTSIDE THE UNITED STATES

For the past several years, ASM journal subscriptions have been fulfilled via air drop shipment to central distribution points, from which the issues were then mailed. Unfortunately, we can no longer afford this service. To hold down drastically rising costs, we have arranged to distribute our journals through surface drop shipment followed by mailing. Subscribers outside the United States will receive their issues two to three weeks later than heretofore, for which we are deeply regretful. There was no way that we could continue the previous service at its very expensive and continually increasing cost.

This change in mode of delivery will be effective beginning with the November issues. Subscribers within the United States and subscribers from abroad who are paying the surcharge for direct air mail shipment will be unaffected by the change.
