

MOLECULAR AND CELLULAR BIOLOGY

Volume 7

June 1987

No. 6

Generation of a Variant t(2;8) Translocation of Burkitt's Lymphoma by Site-Specific Recombination via the Kappa Light-Chain Joining Signals. Peter Hartl and Martin Lipp	2037-2045
Formation of an Active Transcription Complex in the <i>Drosophila melanogaster</i> 5S RNA Gene Is Dependent on an Upstream Region. Alonzo D. Garcia, Anita M. O'Connell, and Stephen J. Sharp	2046-2051
Relatively Stable Population of c-myc RNA That Lacks Long Poly(A). Susanne G. Swartwout, Harvey Preisler, Weidong Guan, and Alan J. Kinniburgh	2052-2058
Protein-Binding Sites within the 5' DNase I-Hypersensitive Region of the Chicken α^D-Globin Gene. Byron Kemper, P. David Jackson, and Gary Felsenfeld	2059-2069
The Highly Conserved U Small Nuclear RNA 3'-End Formation Signal Is Quite Tolerant to Mutation. Robert A. Ach and Alan M. Weiner	2070-2079
Control of Proliferin Gene Expression in Serum-Stimulated Mouse Cells. Daniel I. H. Linzer and Elizabeth L. Wilder	2080-2086
Functional Expression of the cre-lox Site-Specific Recombination System in the Yeast <i>Saccharomyces cerevisiae</i>. Brian Sauer	2087-2096
Structure of Two Developmentally Regulated <i>Dictyostelium discoideum</i> Ubiquitin Genes. Roberto Giorda and Herbert L. Ennis	2097-2103
The Oncogenic Forms of N-ras or H-ras Prevent Skeletal Myoblast Differentiation. Eric N. Olson, Gwendolyn Spizz, and Michael A. Tainsky	2104-2111
Degradation and Biosynthesis of the Glucose Transporter Protein in Chicken Embryo Fibroblasts Transformed by the src Oncogene. Laura K. Shawver, Sue A. Olson, Martyn K. White, and Michael J. Weber	2112-2118
Primary Sequence and Developmental Expression of a Novel <i>Drosophila melanogaster</i> src Gene. Richard J. Gregory, K. L. Kammermeyer, Walter S. Vincent III, and Samuel C. Wadsworth	2119-2127
Guanine Nucleotide Activation of, and Competition between, RAS Proteins from <i>Saccharomyces cerevisiae</i>. Jeffrey Field, Daniel Broek, Tohru Kataoka, and Michael Wigler	2128-2133
<i>Drosophila melanogaster</i> Homologs of the raf Oncogene. George E. Mark, Ross J. MacIntyre, Mary E. Digan, Linda Ambrosio, and Norbert Perrimon	2134-2140
Initiation of Meiosis and Sporulation in <i>Saccharomyces cerevisiae</i> Does Not Require a Decrease in Cyclic AMP. Zofia Olempska-Beer and Ernst Freese	2141-2147
Expression of Small Cytoplasmic Transcripts of the Rat Identifier Element In Vivo and in Cultured Cells. Randall D. McKinnon, Patria Danielson, Mary Ann D. Brow, Floyd E. Bloom, and J. Gregor Sutcliffe	2148-2154
Isolation and Characterization of Temperature-Sensitive RNA Polymerase II Mutants of <i>Saccharomyces cerevisiae</i>. Howard J. Himmelfarb, Elizabeth M. Simpson, and James D. Friesen	2155-2164
Differential Early Viral Gene Expression in Two Stages of Human Papillomavirus Type 16 DNA-Induced Malignant Transformation. Shigeru Yasumoto, Jay Doniger, and Joseph A. DiPaolo	2165-2172
Mouse Protamine 2 Is Synthesized as a Precursor whereas Mouse Protamine 1 Is Not. Pamela C. Yelick, Rod Balhorn, Paula A. Johnson, Michele Corzett, Joe A. Mazrimas, Kenneth C. Kleene, and Norman B. Hecht	2173-2179

Continued on following page

Expression of Rous Sarcoma Virus Transforming Protein pp60^{v-src} in <i>Saccharomyces cerevisiae</i>. Joan S. Brugge, Gregory Jarosik, Janet Andersen, Ana Qeral-Lustig, Mary Fedor-Chaiken, and James R. Broach	2180–2187
Flounder Antifreeze Protein Synthesis under Heat Shock Control in Transgenic <i>Drosophila melanogaster</i>. Derrick E. Rancourt, Virginia K. Walker, and Peter L. Davies	2188–2195
Interferon-Induced Revertants of <i>ras</i>-Transformed Cells: Resistance to Transformation by Specific Oncogenes and Retransformation by 5-Azacytidine. Dvorit Samid, Denise M. Flessate, and Robert M. Friedman	2196–2200
Modification of <i>fos</i> Proteins: Phosphorylation of <i>c-fos</i>, but Not <i>v-fos</i>, Is Stimulated by 12-Tetradecanoyl-Phorbol-13-Acetate and Serum. Jack R. Barber and Inder M. Verma	2201–2211
Elements Involved in Oxygen Regulation of the <i>Saccharomyces cerevisiae</i> <i>CYC7</i> Gene. Richard S. Zitomer, Joan W. Sellers, David W. McCarter, Gregg A. Hastings, Paula Wick, and Charles V. Lowry	2212–2220
The Site-Specific Ribosomal Insertion Element Type II of <i>Bombyx mori</i> (R2Bm) Contains the Coding Sequence for a Reverse Transcriptase-Like Enzyme. William D. Burke, Carolyn C. Calalang, and Thomas H. Eickbush	2221–2230
Three <i>Drosophila</i> Beta-Tubulin Sequences: a Developmentally Regulated Isoform ($\beta 3$), the Testis-Specific Isoform ($\beta 2$), and an Assembly-Defective Mutation of the Testis-Specific Isoform (<i>B2^r</i>) Reveal Both an Ancient Divergence in Metazoan Isotypes and Structural Constraints for Beta-Tubulin Function. Jane E. Rudolph, Mary Kimble, Henry D. Hoyle, Mark A. Subler, and Elizabeth C. Raff	2231–2242
Cellular DNA Rearrangements and Early Developmental Arrest Caused by DNA Insertion in Transgenic Mouse Embryos. Luis Covarrubias, Yasuyoshi Nishida, Mineko Terao, Peter D'Eustachio, and Beatrice Mintz	2243–2247
Intermolecular Recombination Assay for Mammalian Cells That Produces Recombinants Carrying Both Homologous and Nonhomologous Junctions. Suzanne Brouillette and Pierre Chartrand	2248–2255
12-<i>O</i>-Tetradecanoyl-Phorbol-13-Acetate Induction of the Human Collagenase Gene Is Mediated by an Inducible Enhancer Element Located in the 5'-Flanking Region. Peter Angel, Ina Baumann, Bernd Stein, Hajo Delius, Hans Jobst Rahmsdorf, and Peter Herrlich	2256–2266
Identification of a Human Gene (<i>HCK</i>) That Encodes a Protein-Tyrosine Kinase and Is Expressed in Hemopoietic Cells. Nancy Quintrell, Roger Lebo, Harold Varmus, J. Michael Bishop, Mark J. Pettenati, Michelle M. Le Beau, Manuel O. Diaz, and Janet D. Rowley	2267–2275
Novel Protein-Tyrosine Kinase Gene (<i>hck</i>) Preferentially Expressed in Cells of Hematopoietic Origin. Steven F. Ziegler, Jamey D. Marth, David B. Lewis, and Roger M. Perlmutter	2276–2285
Poly-L-Ornithine-Mediated Transformation of Mammalian Cells. V. Craig Bond and Barbara Wold	2286–2293
Homologous Recombination between Coinjected DNA Sequences Peaks in Early to Mid-S Phase. Eric A. Wong and Mario R. Capecchi	2294–2295
Individual Mouse VL30 Elements Transferred to Rat Cells by Viral Pseudotypes Retain Their Responsiveness to Activators of Protein Kinase C. Karin D. Rodland, Anthony M. C. Brown, and Bruce E. Magun	2296–2298
