Molecular and Cellular Biology (ISSN 0270-7306), a publication of the American Society for Microbiology, 1325 Massachusetts Ave., N.W., Washington, DC 20005, is devoted to the advancement and dissemination of fundamental knowledge concerning the molecular biology of eucaryotic cells, of both microbial and higher organisms. Instructions to authors are published in the January issue each year; reprints are available from the editors and the Publications Department. The journal is published monthly, one volume per year. The nonmember subscription price is \$340 per year; single copies are \$30. The member subscription price is \$43 (foreign, \$71 [air drop shipping]) per year; single copies are \$8. Correspondence relating to subscriptions, reprints, defective copies, availability of back issues, lost or late proofs, disposition of submitted manuscripts, and general editorial matters should be directed to the ASM Publications Department, 1325 Massachusetts Ave., N.W., Washington, DC 20005 (area 202 737-3600).

Claims for missing issues from residents of the United States, Canada, and Mexico must be submitted within 3 months after publication of the issues; residents of all other countries must submit claims within 6 months of publication of the issues. Claims for issues missing because of failure to report an address change or for issues "missing from files" will not be allowed.

Second-class postage paid at Washington, DC 20005, and at additional mailing offices.

POSTMASTER: Send address changes to *Molecular and Cellular Biology*, ASM, 1325 Massachusetts Ave., N.W., Washington, DC 20005.

Among the finest scientific journals in the world

The American Society for Microbiology publishes ten journals and the *ASM News*. Taken together, these highly respected and widely read journals form an integrative program serving the entire range of microbiological research.

Journal of Bacteriology

Since 1916, a leading journal for fundamental research on bacteria and other microorganisms. General Microbiology. Structure and Function. Plant Microbiology. Genetics and Molecular Biology. Plasmids and Transposons. Eucaryotic Cells. Membranes. Physiology and Metabolism. Bacteriophages. Population Genetics and Evolution.

5,900 pages. Monthly. Nonmember price, \$340. Samuel Kaplan, editor in chief.

Molecular and Cellular Biology

Gene Expression. Cell Cycle and Development. Cell and Organelle Structure and Assembly. Chromosome Structure and Dynamics.

5,500 pages. Monthly. Nonmember price, \$340. Aaron J. Shatkin, editor in chief.

Infection and Immunity

Bacterial Infections and Immunity. Fungal and Parasitic Infections and Immunity. Pathogenesis. Immune Mechanisms.

3,500 pages. Monthly. Nonmember price, \$340. Joseph W. Shands, Jr., editor in chief.

Journal of Virology

Animal Viruses. Virus-Cell Interactions. Plant Viruses. Viral Pathogenesis and Immunity. Viral and Cellular Oncogenes.

4,700 pages. Monthly. Nonmember price, \$350. Arnold J. Levine, editor in chief.

Applied and Environmental Microbiology

Genetics and Molecular Biology. Physiology and Biotechnology. Enzymology and Protein Engineering. Food Microbiology. Mycology. Applied Environmental and Public Health Microbiology. General Microbial Ecology. Methods. Microorganism-Plant Interactions.

3,300 pages. Monthly. Nonmember price, \$220. Lars G. Ljungdahl, editor in chief.

Microbiological Reviews

Long established as the definitive review journal in basic microbiology and immunology and molecular biology, MR has a higher citation index than any other scientific journal.

650 pages. Quarterly. Nonmember price, \$115. John L. Ingraham, editor.

Antimicrobial Agents and Chemotherapy

Chemistry. Biosynthesis. Mechanisms of Action: Physiological Effects. Mechanisms of Resistance. Susceptibility. Analytical Procedures. Experimental Therapeutics. Clinical Therapeutics. Pharmacology.

2,100 pages. Monthly. Nonmember price, \$220. Robert C. Moellering, Jr., editor in chief.

Journal of Clinical Microbiology

Bacteriology. Virology, Rickettsiology, and Chlamydiology. Mycology, Mycobacteriology, and Aerobic Actinomycetes. Parasitology. Epidemiology. Hospital Epidemiology. Immunology. General Clinical Microbiology. Automation; Analytical and Molecular Clinical Microbiology. Technological Developments. Clinical Veterinary Microbiology.

2,600 pages. Monthly. Nonmember price, \$220. Henry D. Isenberg, editor in chief.

Clinical Microbiology Reviews

Our newest journal, presenting timely reviews of the most important topics in clinical and medical microbiology and immunology.

550 pages. Quarterly. Nonmember price, \$80. Josephine A. Morello, editor.

International Journal of Systematic Bacteriology

The official publication of the International Committee on Systematic Bacteriology of the I.U.M.S., publishing on the systematics of bacteria, yeasts, and yeastlike organisms.

650 pages. Quarterly. Nonmember price, \$150. W. E. C. Moore, editor in chief.

ASM News

Our monthly magazine, filled with items of widespread interest to microbiologists and ASM members, including feature articles, reports on legislative and policy items, Society activities, book reviews, letters, employment ads, and calendar of events.

650 pages. Monthly. Nonmember price, \$19. Michael I. Goldberg, editor in chief.

MCB 7/89

Please write to the ASM Publications Department to request an ASM Publications Catalog or an ASM membership application. ASM members pay \$65.00 in annual dues, to receive *ASM News* and a journal credit that will cover more than one additional journal, special member rates on all ASM publications and services, and many other benefits. (Subscriptions are entered on a calendar year basis only and must be prepaid by check or draft in U.S. dollars drawn on a bank located within the continental United States or charged to VISA, MasterCard, or American Express.)

Write to the **American Society for Microbiology**, Publications Department, 1913 I Street, N.W., Washington, DC 20006.

NEW ASM ADDRESS

As of 23 July 1989, ASM will have a new mailing address and telephone number. Direct manuscripts, copyright transfer agreements, reprint/page charge forms, galley proofs, inquiries about manuscripts, and matters related to journals to:

**Publications Department
American Society for Microbiology
1325 Massachusetts Ave., N.W.
Washington, DC 20005**

Telephone: (202) 737-3600

*In-depth coverage of essentially
all mobile DNA systems*

Mobile DNA

*Edited by Douglas E. Berg, Washington
University School of Medicine, St. Louis,
Missouri, and Martha M. Howe, University of
Tennessee, Memphis*

Mobile DNA presents a thorough examination of the remarkable ability of DNA to move to new sites, invert, and undergo deletion or amplification, generally without the extensive sequence homology needed for classical recombination. The 43 chapters, by a stellar group of authors, describe the great variety of mechanisms by which these rearrangements occur, how they are regulated, their biological consequences, and ways in which transposable elements can be exploited as potent research tools.

The reader will be struck by the great diversity of mobile DNAs. No less striking are the relationships among mobile DNAs from quite disparate organisms, both procaryotic and eucaryotic.

Chapters variously reflect the sophisticated understanding of intensively studied elements and the tantalizing early findings of emerging elements or systems, and each chapter provides insights into the current state of our knowledge while pointing out future research directions.

This book will serve scientists with diverse interests and experience, from students just discovering the excitement and power of modern molecular genetics to teachers and senior researchers. Microbiologists, biochemists, molecular biologists, cell biologists, virologists, evolutionists, and geneticists all will find much to interest them here.

Hardcover (ISBN 1-55581-005-5)
Prices: Member, \$75.00;
Nonmember, \$95.00
Publication date: March 1989
990 pages, illustrated, color plates, index
